SUPPLEMENTARY INFORMATION: NDAA 08, Section 807 amends section 2330a of Title 10 United States Code to require annual inventories and reviews of activities performed under services contracts. The Deputy Under Secretary of Defense (Acquisition and Technology) (DUSD (A&T)) set forth a phased plan to implement Section 807 requirements. In the memorandum entitled "Inventories and Review of Contracts for Services" (May 16, 2008), the DUSD (A&T) required the U.S. Army to develop a prototype inventory list. The Army developed and provided the prototype inventory list by pulling data from the Contractor Manpower Reporting Application, the Federal Procurement Data System—Next Generation, and the Army Contracting Business Intelligence System. The inventory does not include contract numbers, contractor identification or other proprietary or sensitive information as this data can be used to disclose a contractor's proprietary proposal information.

Additional information about the Army inventory will be provided on the ASA(M&RA) Web site at the following location:

Availability of a Final Integrated Feasibility Report and Environmental Impact Statement for the Mid-Chesapeake Bay Island Ecosystem Restoration Project in Dorchester County, on Maryland's Eastern Shore

AGENCY: Department of the Army, U.S. Army Corps of Engineers, DOD.

ACTION: Notice of availability.

SUMMARY: In accordance with the requirements of the National Environmental Policy Act (NEPA), the U.S. Army Corps of Engineers (USACE), Baltimore District has prepared a Final Integrated Feasibility Report and Environmental Impact Statement (EIS) for the Mid-Chesapeake Bay Island Ecosystem Restoration Project in Dorchester County, on Maryland's Eastern Shore. Approximately 90 to 95 million cubic yards of material, primarily dredged during maintenance of the Chesapeake Bay approach channels to Baltimore Harbor, would be placed behind dikes at James Island. Material placed at Barren Island would be from authorized maintenance dredging of Federal navigation channels in the Honga River. After placement, the material would be shaped and planted to provide 2,144 acres of island habitat at James and Barren Islands as well as protect existing island ecosystem habitat, including critical submerged aquatic vegetation. A Record of Decision may be signed no earlier than 30 days after the EPA Notice of Availability for the Final document.

FOR FURTHER INFORMATION CONTACT: U.S. Army Corps of Engineers, Baltimore District, Attn: Dr. Angie Sowers at CENAB-PL-P, P.O. Box 1715, Baltimore, MD 21203-1715, electronically at Angela.Sowers@usace.army.mil or by telephone at (410) 962-7440 or (800) 295-1610.

SUPPLEMENTARY INFORMATION: The Mid-Chesapeake Bay Ecosystem Restoration was one of three actions specifically recommended by the USACE-Baltimore District's, *Dredged Material Management Plan (DMMP) and Final Tiered Environmental Impact Statement* (December 2005). The USACE is making the Final Mid-Chesapeake Bay Island Ecosystem Restoration Integrated Feasibility Report and EIS known through a Notice of Availability published in the **Federal Register**. The recommendations of the draft Mid-Chesapeake Bay report and EIS are:

- Construction of a 2,072-acre fill area at James Island, consisting of approximately 55 percent tidal wetland habitat and 45 percent upland island habitat;

- Construction and backfilling of sills at Barren Island to protect both the current acreage of the island and the adjacent submerged aquatic vegetation (SAV)/shallow water habitat, providing approximately 72 acres of wetland habitat on the northern and western portions of the island; and

- If deemed necessary to protect the SAV, construction at Barren Island of a maximum of 8,200 feet of breakwater extending South from the southern tip of the existing island at a maximum height of plus 6 feet MLLW. The Draft and Final Integrated Feasibility reports and EISs have been prepared in accordance with (1) NEPA of 1969, as amended (42 U.S.C. 4321 *et seq.*), (2) regulations of the Council on Environmental Quality for implementing the procedural provisions of NEPA (40 CFR parts 1500-1508), and (3) USACE regulations implementing NEPA (ER-200-2-2).

- James and Barren Islands have been identified by the U.S. Fish and Wildlife Service, and other natural resource management agencies as a valuable nesting and nursery area for many species of wildlife, including bald eagles, diamondback terrapins, and potentially horseshoe crabs. The project would restore James Island and protect Barren Island from further erosion. The reports and EISs document the NEPA compliance and information specific to the actions for the proposed Mid-Chesapeake Bay project.

You may view the EIS and related information on the USACE Web page at http://www.nab.usace.army.mil/publications/non-reg_pub.htm. USACE has distributed copies of the Final Integrated Feasibility Report and EIS to appropriate members of Congress, State and local government officials, Federal agencies, and other interested parties.
