Title: Study of Sharing to Assess Community Resilience.

OMB Control Number: 1010-NEW.

Abstract: The United States Congress, through the 1953 Outer Continental Shelf Lands Act (OCSLA) [Pub. L. 95-372, section 20] and its subsequent amendments, requires the Secretary of the U.S. Department of the Interior (USDOI) to monitor and assess the impacts of resource development activities in Federal waters on human, marine, and coastal environments. The OCSLA amendments authorize the Secretary of the Interior to conduct studies in areas or regions of sales to ascertain the "environmental impacts on the marine and coastal environments of the outer Continental shelf and the coastal areas which may be affected by oil and gas development" (43 U.S.C. 1346).

The Council on Environmental Quality's Regulations for Implementing Procedural Provisions of NEPA (40 CFR 1500-1508) state that the "human environment" is to be "interpreted comprehensively" to include "the natural and physical environment and the relationship of people with that environment" (40 CFR 1508.14). An action's "aesthetic, historic, cultural, economic, social or health" effects must be assessed, "whether direct, indirect, or cumulative" (40 CFR 1508.8).

The USDOI/Minerals Management Service (MMS) is the Federal administrative agency created both to conduct OCS lease sales and to monitor and mitigate adverse impacts that might be associated with offshore resource development. Within the MMS, the
