DEPARTMENT OF AGRICULTURE

Submission for OMB Review; Comment Request

December 8, 2011.

The Department of Agriculture has submitted the following information collection requirement(s) to OMB for review and clearance under the Paperwork Reduction Act of 1995, Public Law 104–13. Comments regarding (a) whether the collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility; (b) the accuracy of the agency's estimate of burden including the validity of the methodology and assumptions used; (c) ways to enhance the quality, utility and clarity of the information to be collected; (d) ways to minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology should be addressed to: Desk Officer for Agriculture, Office of Information and Regulatory Affairs, Office of Management and Budget (OMB),

OIRA_Submission@OMB.EOP.GOV or fax (202) 395–5806 and to Departmental Clearance Office, USDA, OCIO, Mail Stop 7602, Washington, DC 20250– 7602. Comments regarding these information collections are best assured of having their full effect if received within 30 days of this notification. Copies of the submission(s) may be obtained by calling (202) 720–8958.

An agency may not conduct or sponsor a collection of information unless the collection of information displays a currently valid OMB control number and the agency informs potential persons who are to respond to the collection of information that such persons are not required to respond to the collection of information unless it displays a currently valid OMB control number.

Animal Plant and Health Inspection Service

Title: Virus-Serum-Toxin Act and Regulations in 9 CFR, Subchapter E, Parts 101–124.

OMB Control Number: 0579-0013. Summary of Collection: The Virus-Serum-Toxin Act (37 Stat. 832-833, 21 U.S.C. 151–159) gives the United States Department of Agriculture, the Animal and Plant Health Inspection Service (APHIS) the authority to promulgate regulations designed to prevent the importation, preparation, sale, or shipment of harmful veterinary biological products. A veterinary biological product is defined as all viruses, serums, toxins, and analogous products of natural or synthetic origin. In order to effectively implement the licensing, production, labeling, importation, and other requirements, APHIS employs a number of

information gathering tools such as establishment license applications, product license applications, product permit applications, product and test report forms and field study summaries.

Need and Use of the Information: APHIS uses the information collected as a primary basis for the approval or acceptance of issuing licenses or permits to ensure veterinary biological products that are used in the United States are pure, safe, potent, and effective. Also, APHIS uses the information to monitor the serials for purity, safety, potency and efficacy that are produced by licensed manufacturers prior to their release for marketing. Failing to collect this information would severely cripple APHIS' ability to prevent harmful veterinary biologics from being distributed in the United States.

Description of Respondents: Business or other for profit; State, Local or Tribal Government.

Number of Respondents: 202.

Frequency of Responses:

Recordkeeping; Reporting: On occasion. *Total Burden Hours:* 74,386.

Animal and Plant Health Inspection Service

Title: Scrapie in Sheep and Goats; Interstate Movement Restrictions and Indemnity Program.

OMB Control Number: 0579–0101. Summary of Collection: Under the Farm Security and Rural Investment Act of 2002. Public Law 107–71, subtitle E. Animal Health Protection, Section 10401–10418, the Secretary of Agriculture, in order to protect the agriculture, environment, economy, and health and welfare of the people of the United States by preventing, detecting, controlling, and eradicating diseases and pests of animal, is authorized to cooperate with foreign countries, States, and other jurisdictions, or other person, to prevent and eliminate burdens on interstate commerce and foreign commerce, and to regulate effectively interstate commerce and foreign commerce. Scrapie is a progressive, degenerative and eventually fatal disease affecting the central nervous system of sheep and goats. Its control is complicated because the disease has an extremely long incubation period

without clinical signs of disease, and there is no test for the disease and or known treatment. The Animal and Plant Health Inspection Service (APHIS) restricts the interstate movement of certain sheep and goats to help prevent the spread of scrapie. APHIS has regulations at 9 CFR part 54 for an indemnity program to compensate owners of sheep and goats destroyed because of scrapie.

Need and Use of the Information: APHIS will collect information using cooperative agreements; applications from owners to participate in the Scrapie Flock Certification Program; post-exposure management and monitoring plans; scrapie test records; application for indemnity payments; certificates, permits, and owner statements for the interstate movement of certain sheep and goats; application for premises identification numbers; and applications for APHIS-approved eartags, backtags, or tattoos, etc. Without this information APHIS' efforts to more aggressively prevent the spread of scrapie would be severely hindered.

Description of Respondents: Business or other for-profit; Not for Profit; and State, Local, or Tribal Government.

Number of Respondents: 112,000.

Frequency of Responses: Recordkeeping; Reporting: On occasion. Total Burden Hours: 897,030.

Ruth Brown,

Departmental Information Collection Clearance Officer. [FR Doc. 2011–32004 Filed 12–13–11; 8:45 am] BILLING CODE 3410–34–P

DEPARTMENT OF AGRICULTURE

Forest Service

Information Collection; Flathead and McKenzie Rivers and McKenzie National Recreational Trail Visitor Surveys

AGENCY: Forest Service, USDA. **ACTION:** Notice; request for comment.

SUMMARY: In accordance with the Paperwork Reduction Act of 1995, the Forest Service is seeking comments from all interested individuals and organizations on the new information collection, Flathead Wild and Scenic River Visitor Survey and McKenzie River Visitor Survey.

DATES: Comments must be received in writing on or before February 13, 2012 to be assured of consideration. Comments received after that date will be considered to the extent practicable. **ADDRESSES:** Comments concerning this notice should be addressed to: USDA,

Forest Service, *Attn:* Chris Ryan, Northern Region, P.O. Box 7669, Missoula, MT 59807. Comments also may be submitted via email to: *cryan@fs.fed.us.*

The public may inspect comments received at the Northern Region, 200 E. Broadway, Missoula, MT, during normal business hours. Visitors are encouraged to call ahead to (406) 329–3522 to facilitate entry to the building.

FOR FURTHER INFORMATION CONTACT:

Flathead—Colter Pence, Flathead National Forests, (406) 387–3949 and Willamette—Matt Peterson, Willamette National Forest at (541) 225–6421. Individuals who use telecommunication devices for the deaf (TDD) may call the Federal Relay Service (FRS) at 1–(800) 877–8339, between 8am and 8pm, Eastern Standard time, Monday through Friday.

SUPPLEMENTARY INFORMATION:

Title: Flathead Wild and Scenic River Visitor Survey and McKenzie River Visitor Survey.

OMB Number: 0596–NEW. *Expiration Date of Approval:* NA. *Type of Request:* New.

Abstract: The Flathead and Willamette National Forests are proposing to implement an information collection from forest visitors who are recreating on or near the Flathead Wild and Scenic River or on or near the McKenzie Wild and Scenic River or McKenzie National Recreational Trail. There are different issues on each river creating a need to collect different information; therefore, two separate surveys will be administered for the Flathead and Willamette Rivers though the methodology for collection will be essentially identical.

The visitor survey will support development of the Flathead Comprehensive River Management Plan (CRMP), implementation of the exiting Upper McKenzie River Management Plan, and will provide needed information for managers to protect and enhance the outstandingly remarkable values for which the Flathead and McKenzie Rivers were designated. In addition, the survey proposed will help managers to identify the most important indicators to monitor over the life of the plan to determine if any thresholds are being approached and if management action may need to occur.

Information will be collected from visitors who are recreating on or near the Flathead and McKenzie Rivers and McKenzie National Recreational Trail by in-person, written surveys which will be administered by Forest Service or National Park Service (Flathead) employees, volunteers, or study cooperators to randomly selected visitors. Surveys will ask visitors to provide information about their trip and activities, environmental and social conditions that may alter the quality of their recreational experience, and their attitudes toward different existing and potential recreation management policies and practices. Visitors' responses are voluntary and anonymous.

Data will be entered into an Excel database. Once data entry has been completed and validated, the hardcopy questionnaires will be discarded. Data will be imported into SPSS (Statistical Package for the Social Sciences) for analysis. The database will be maintained at the respective National Forest to and used for development of subsequent management plans and direction.

Collecting thoughts from the public on how these areas should be managed and consideration of their interests and priorities is a critical component to developing a fair and balanced management plan and strategy. Without the public's involvement, a plan has the risk of being biased and ineffective.

Estimate of Annual Burden: 20 minutes.

Type of Respondents: National Forest and National Park (Flathead) visitors (adults, age 16 and older) who are recreating on or near the Flathead or McKenzie Rivers or the McKenzie National Recreational Trail.

Estimated Annual Number of Respondents: 1000 (Willamette) and 1200 (Flathead).

Estimated Annual Number of Responses per Respondent: 1.

Estimated Total Annual Burden on Respondents: 333 hours (Willamette) and 400 hours (Flathead).

Comment Is Invited

Comment is invited on: (1) Whether this collection of information is necessary for the stated purposes and the proper performance of the functions of the Agency, including whether the information will have practical or scientific utility; (2) the accuracy of the Agency's estimate of the burden of the collection of information, including the validity of the methodology and assumptions used; (3) ways to enhance the quality, utility, and clarity of the information to be collected; and (4) ways to minimize the burden of the collection of information on respondents, including the use of automated, electronic, mechanical, or other technological collection techniques or other forms of information technology.
