BILLING CODE 3510-13-P

DEPARTMENT OF COMMERCE

National Institute of Standards and Technology

Proposed Information Collection; Comment Request; the Building Construction Technology Extension Pilot Client Impact Survey

AGENCY: National Institute of Standards and Technology (NIST), Commerce.

ACTION: Notice.

SUMMARY: The Department of Commerce, as part of its continuing effort to reduce paperwork and respondent burden, invites the general public and other Federal agencies to take this opportunity to comment on proposed and/or continuing information collections, as required by the Paperwork Reduction Act of 1995.

DATES: Written comments must be submitted on or before August 6, 2013.

ADDRESSES: Direct all written comments Jennifer Jessup, Departmental Paperwork Clearance Officer, Department of Commerce, Room 6616, 14th and Constitution Avenue NW., Washington, DC 20230 (or via the Internet at jjessup@doc.gov).

FOR FURTHER INFORMATION CONTACT: Requests for additional information or copies of the information collection instrument and instructions should be directed to Dede McMahon, NIST MEP, 100 Bureau Drive, Stop 4800, Gaithersburg, Maryland 20899-4800; (301-975-8328); deirdre.mcmahon@nist.gov.

SUPPLEMENTARY INFORMATION:

I. Abstract

This is a request for a new information collection.

Sponsored by the National Institute of Standards and Technology (NIST), the Manufacturing Extension Partnership (MEP) and the Department of Energy (DOE), Energy Efficiency and Renewable

Energy/Building Technologies Office (EERE/BTO), the Building Construction Technology Extension Pilot (BCTEP) is focused on training building operators in the principles and practices of building energy systems re-tuning. Re-tuning is a systematic semi-automated process of identifying operational problems in commercial and industrial buildings. It leverages data collected from the building automation system to identify opportunities to improve the building operations and provides guidance on implementing corrections at no cost or very low cost, leading to a reduction in the overall energy consumption.

NIST MEP, in collaboration with the DOE EERE/BTO, has funded 3 projects in CA, NY and PA to develop, refine and test curricula for buildings that do and do not have building automation systems, then train trainers to deliver the curriculum to building operators, using real commercial, government and industrial buildings as the test beds.

The purpose of the survey is to collect information that will provide the MEP with information regarding Competitive Award Recipient performance regarding the delivery of technology and business solutions to U.S.-based clients.

II. Method of Collection

Information will be collected electronically.

III. Data

OMB Control Number: None.

Form Number: None.

Type of Review: Regular submission (new information collection).

Affected Public: Business or other for-profit organizations; Not-for-profit institutions.

Estimated Number of Respondents: 50.

Estimated Time per Response: 15 minutes.

Estimated Total Annual Burden Hours: 13.

Estimated Total Annual Cost to Public: \$0.

IV. Request for Comments

Comments are invited on: (a) Whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information shall have practical utility; (b) the accuracy of the agency's estimate of the burden (including hours and cost) of the proposed collection of information; (c) ways to enhance the quality, utility, and clarity of the information to be collected; and (d) ways to minimize the burden of the collection of information on respondents, including through the

use of automated collection techniques or other forms of information technology.

Comments submitted in response to this notice will be summarized and/or included in the request for OMB approval of this information collection; they also will become a matter of public record.

Dated: June 4, 2013.

Gwellnar Banks,

Management Analyst, Office of the Chief Information Officer.

National Oceanic and Atmospheric Administration

RIN 0648-XC431

Endangered and Threatened Species; Recovery Plan for the North Pacific Right Whale

AGENCY: National Marine Fisheries Service, National Oceanic and Atmospheric Administration, Commerce.

ACTION: Notice of availability.

SUMMARY: The National Marine Fisheries Service (NMFS) announces the adoption and availability of the final Recovery Plan (Plan) for the North Pacific right whale (*Eubalaena japonica*).

ADDRESSES: Electronic copies of the Final Recovery Plan are available online at <http://www.nmfs.noaa.gov/pr/recovery/plans.htm>.

FOR FURTHER INFORMATION CONTACT: Shannon Bettridge (301-427-8402), email Shannon.Bettridge@noaa.gov or Larissa Plants (301-427-8403), email Larissa.Plants@noaa.gov.

SUPPLEMENTARY INFORMATION:

Background

Recovery plans describe actions beneficial to the conservation and recovery of species listed under the Endangered Species Act of 1973 (ESA), as amended (16 U.S.C. 1531 *et seq.*). Section 4(f)(1) of the ESA requires that recovery plans incorporate: (1) Objective, measurable criteria which, when met, would result in a determination that the species is no longer threatened or endangered; (2) site-specific management actions necessary to achieve the Plan's goals; and (3) estimates of the time required and costs to implement recovery actions. The ESA requires the development of recovery plans for each

listed species unless such a plan would not promote its recovery.

The Northern right whale (*Eubalaena glacialis*) has been listed as “endangered” under the Endangered Species Act (ESA) since its passage in 1973. In 2008, NMFS determined that the Northern right whale should be listed as two separate species, the North Pacific right whale and the North Atlantic right whale. North Pacific right whales historically had a wide distribution in the Pacific Ocean, but the population was dramatically reduced by extensive commercial whaling, now prohibited by the International Whaling Commission. Scientists estimate that less than 1,000 individuals remain. Of the commercially exploited “great whales,” the North Pacific right whale is one of the least well studied, and the current status of the North Pacific right whale population is poorly understood. Currently, the population structure of North Pacific right whales has not been adequately defined.

Because the current status of North Pacific right whales is unknown, the primary purpose of the Recovery Plan is to provide a research strategy to obtain data necessary to determine distribution and estimate population abundance, trends, and structure and to identify factors that may be limiting North Pacific right whale recovery. Criteria for the reclassification of the North Pacific right whale are included in the Recovery Plan. In summary, the North Pacific right whale may be reclassified from endangered to threatened when all of the following have been met: (1) Given current and projected threats and environmental conditions, the North Pacific right whale population satisfies the risk analysis standard for threatened status (has no more than a 1 percent chance of extinction in 100 years) and has at least 1,000 mature, reproductive individuals (consisting of at least 250 mature females and at least 250 mature males in each population). Mature is defined as individuals known, estimated, or inferred to be capable of reproduction. Any factors or circumstances that are thought to substantially contribute to a real risk of extinction that cannot be incorporated into a Population Viability Analysis will be carefully considered before downlisting takes place; and (2) none of the known threats to North Pacific right whales are known to limit the continued growth of populations. Specifically, the factors in 4(a)(1) of the ESA are being or have been addressed: (A) The present or threatened destruction, modification or curtailment of a species’ habitat or range; (B) overutilization for

commercial, recreational or educational purposes; (C) disease or predation; (D) the inadequacy of existing regulatory mechanisms; and (E) other natural or manmade factors.

The population will be considered for delisting if all of the following can be met: (1) Given current and projected threats and environmental conditions, the total North Pacific right whale population satisfies the risk analysis standard for unlisted status (has less than a 10 percent probability of becoming endangered in 20 years). Any factors or circumstances that are thought to substantially contribute to a real risk of extinction that cannot be incorporated into a Population Viability Analysis will be carefully considered before delisting takes place; and (2) none of the known threats to North Pacific right whales are known to limit the continued growth of populations. Specifically, the factors in 4(a)(1) of the ESA are being or have been addressed. The time and cost to recovery is not predictable with the current information on North Pacific right whales. The difficulty in gathering data on North Pacific right whales and uncertainty about the success of passive acoustic monitoring in fulfilling data needs make it impossible to give a timeframe to recovery. While we are comfortable estimating costs for 50 years of plan implementation (\$27.283 million), any projections beyond this date are likely to be too imprecise to predict. The anticipated date for removal from the endangered species list also cannot be determined because of the uncertainty in the success of recovery plan actions for North Pacific right whales. The effectiveness of many management activities is not known on a global level. Currently it is impossible to predict when such measures will bring the species to a point at which the protections provided by the ESA are no longer warranted, or even determine whether the species has recovered enough to be downlisted or delisted. In the future, as more information is obtained it should be possible to make more informative projections about the time to recovery, and its expense. NMFS has reviewed the Plan for compliance with the requirements of the ESA section 4(f), determined that it does incorporate the required elements, and is therefore adopting it as the Final Recovery Plan North Pacific Right Whales.

Authority: 16 U.S.C. 1531 *et seq.*

Dated: June 4, 2013.

Angela Somma,

Chief, Endangered Species Division, Office of Protected Resources, National Marine Fisheries Service.

National Oceanic and Atmospheric Administration

RIN 0648–XC716

Fisheries of the Gulf of Mexico; Southeast Data, Assessment, and Review (SEDAR); Public Meeting

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notice of SEDAR 33 Gulf of Mexico Gag and Greater Amberjack webinar.

SUMMARY: The SEDAR 33 assessment of the Gulf of Mexico stocks of Gag (*Mycteroperca microlepis*) and Greater Amberjack (*Seriola dumerili*) will consist of two workshops and a series of webinars: a Data Workshop; an Assessment process conducted via webinars; and a Review Workshop. This series of workshops and webinars will be referred to as SEDAR 33. This notice is for an additional webinar prior to the first Assessment Workshop webinar.

DATES: The Post-Data Workshop webinar will be held on Thursday, June 27, 2013 at 10 a.m. Eastern Time. See **SUPPLEMENTARY INFORMATION**.

ADDRESSES: The webinar will be held via GoToWebinar online meeting service. All workshops and webinars are open to members of the public. Those interested in participating should contact Ryan Rindone at SEDAR (see **FOR FURTHER INFORMATION CONTACT**) to request an invitation providing pertinent information. Please request meeting information at least 24 hours in advance.

SEDAR address: 4055 Faber Place Drive, Suite 201, N. Charleston, SC 29405.

FOR FURTHER INFORMATION CONTACT: Ryan Rindone, SEDAR Coordinator; telephone: (813) 348–1630; email: ryan.rindone@gulfcouncil.org

SUPPLEMENTARY INFORMATION: The Gulf of Mexico, South Atlantic, and Caribbean Fishery Management Councils, in conjunction with NOAA Fisheries and the Atlantic and Gulf States Marine Fisheries Commissions, have implemented the Southeast Data,
