

amend the Mandatory Reporting of Greenhouse Gases rule, published on October 30, 2009 by requiring reporting of greenhouse gases from additional industry source categories.

One hearing will be held in Arlington, Virginia (which is in the Washington, DC, area) on April 19, 2010. It will cover the proposed rule "Mandatory Reporting of Greenhouse Gases: Petroleum and Natural Gas Systems" and the proposed rule "Mandatory Reporting of Greenhouse Gases: Injection and Geologic Sequestration of Carbon Dioxide." These two notices will be being published in separate notices of proposed rulemaking.

The other hearing will be held in Washington, DC, on April 20, 2010. It will cover the proposed rule "Mandatory Reporting of Greenhouse Gases: Additional Sources of Fluorinated GHGs," which will be published in a separate notice of proposed rulemaking.

The proposed rules do not require control of greenhouse gases, rather they require only that sources above certain threshold levels monitor and report emissions and carbon dioxide injection and geologic sequestration. The signed notices of proposed rulemaking were posted on the EPA Web site prior to publication in the **Federal Register**, and contained the same public hearing dates presented in this announcement.

DATES: There will be two public hearings. One hearing will be held on April 19, 2010 in Arlington, VA. The other hearing will be on April 20, 2010 in Washington, DC. Idaho: Incorporation by Reference of Approved State Hazardous Waste Management Program

AGENCY: Environmental Protection Agency (EPA).

ACTION: Proposed rule.

SUMMARY: The EPA proposes to codify in the regulations entitled "Approved State Hazardous Waste Management Programs," Idaho's authorized hazardous waste program. SUPPLEMENTARY INFORMATION: In the "Rules and Regulations" section of this **Federal Register**, the EPA is codifying and incorporating by reference the State's hazardous waste program as an direct final rule. The EPA did not make a proposal prior to the direct final rule because we believe these actions are not controversial and do not expect comments that oppose them. We have explained the reasons for this codification and incorporation by reference in the preamble to the direct final rule. Unless we get written comments which oppose this incorporation by reference during the comment period, the direct final rule will become effective on the date it establishes, and we will not take further action on this proposal. If we get comments that oppose these actions, we will withdraw the direct final rule and it will not take effect. We will then respond to public comments in a later final rule based on this proposal. You may not have another opportunity for comment. If you want to comment on this action, you must do so at this time. For additional information, please see the direct final rule published in the "Rules and Regulations" section of this **Federal Register**.

Authority: This action is issued under the authority of sections 2002(a), 3006 and 7004(b) of the Solid Waste and Disposal Act, as amended, 42 U.S.C. 6912(a), 6926, 6974(b).

RIN 2025-AA28

Addition of National Toxicology Program Carcinogens; Community Right-to-Know Toxic Chemical Release Reporting

AGENCY: Environmental Protection Agency (EPA).

ACTION: Proposed rule.

SUMMARY: EPA is proposing to add sixteen chemicals to the list of toxic chemicals subject to reporting under section 313 of the Emergency Planning and Community Right-to-Know Act (EPCRA) of 1986 and section 6607 of the Pollution Prevention Act of 1990 (PPA). These sixteen chemicals have been classified by the National Toxicology Program (NTP) in their Report on Carcinogens (RoC) as "reasonably anticipated to be a human carcinogen." EPA believes that these sixteen chemicals meet the EPCRA section 313(d)(2)(B) criteria because they can reasonably be anticipated to cause cancer in humans. As in past chemical reviews, EPA adopted a production volume screen for the development of this proposed rule to screen out those chemicals for which no reports are expected to be submitted. Based on a review of the available production and use information, these sixteen chemicals are expected to be manufactured, processed, or otherwise used in quantities that would exceed the EPCRA section 313 reporting thresholds.
