

king mackerel commercial fishery when its quota has been reached, by filing a notification at the Office of the Federal Register. NMFS has determined that the commercial quota of 1,040,625 lb (472,000 kg) for Gulf group king mackerel in the Florida east coast subzone will be reached on February 20, 2008. Accordingly, the commercial fishery for king mackerel in the Florida east coast subzone is closed at 12:01 a.m., local time, February 21, 2008, through 12:01 a.m., local time, March 31, 2008.

From November 1 through March 31 the Florida east coast subzone of the Gulf group king mackerel is that part of the eastern zone north of 25°20.4' N. lat. (a line directly east from the Miami-Dade/Monroe County, FL, boundary) to 29°25' N. lat. (a line directly east from the Flagler/Volusia County, FL, boundary). Beginning April 1, the boundary between Atlantic and Gulf groups of king mackerel shifts south and west to the Monroe/Collier County boundary on the west coast of Florida. From April 1 through October 31, king mackerel harvested along the east coast of Florida, including all of Monroe County, are considered to be Atlantic group king mackerel.

Classification

This action responds to the best available information recently obtained from the fishery. The Assistant Administrator for Fisheries, NOAA, finds that the need to immediately implement this action to close the fishery constitutes good cause to waive the requirements to provide prior notice and opportunity for public comment pursuant to the authority set forth in 5 U.S.C. 553(b)(B), as such procedures would be unnecessary and contrary to the public interest. Such procedures would be unnecessary because the rule itself already has been subject to notice and comment, and all that remains is to notify the public of the closure.

NMFS also finds good cause that the implementation of this action cannot be delayed for 30 days. There is a need to implement this measure in a timely fashion to prevent an overrun of the commercial fishery for king mackerel in the Florida east coast subzone, given the capacity of the fishing fleet to harvest the quota quickly. Any delay in implementing this action would be contrary to the Magnuson-Stevens Act and the FMP. Accordingly, under 5 U.S.C. 553(d), a delay in the effective date is waived.

This action is taken under 50 CFR 622.43(a) and is exempt from review under Executive Order 12866.

Authority: 16 U.S.C. 1801 *et seq.*

Dated: February 20, 2008.

Emily H. Menashes,

Acting Director, Office of Sustainable Fisheries, National Marine Fisheries Service.

Fisheries of the Exclusive Economic Zone Off Alaska; Pollock in Statistical Area 630 of the Gulf of Alaska

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Temporary rule; modification of a closure.

SUMMARY: NMFS is reopening directed fishing for pollock in Statistical Area 630 of the Gulf of Alaska (GOA) for 48 hours. This action is necessary to fully use the A season allowance of the 2008 total allowable catch (TAC) of pollock specified for Statistical Area 630 of the GOA.

DATES: Effective 1200 hrs, Alaska local time (A.l.t.), February 23, 2008, through 1200 hrs, A.l.t., February 25, 2008. Comments must be received at the following address no later than 4:30 p.m., A.l.t., March 7, 2008.

ADDRESSES: Send comments to Sue Salvesson, Assistant Regional Administrator, Sustainable Fisheries Division, Alaska Region, NMFS, Attn: Ellen Sebastian. You may submit comments, identified by 0648–XF82, by any one of the following methods:

- Electronic Submissions: Submit all electronic public comments via the Federal eRulemaking Portal website at <http://www.regulations.gov>;

- Mail: P.O. Box 21668, Juneau, AK 99802;

- Fax: (907) 586–7557; or

- Hand delivery to the Federal Building: 709 West 9th Street, Room 420A, Juneau, AK.

Instructions: All comments received are a part of the public record and will generally be posted to <http://www.regulations.gov> without change. All Personal Identifying Information (for example, name, address, etc.) voluntarily submitted by the commenter may be publicly accessible. Do not

submit Confidential Business Information or otherwise sensitive or protected information.

NMFS will accept anonymous comments. Attachments to electronic comments will be accepted in Microsoft Word, Excel, WordPerfect, or Adobe PDF file formats only.

FOR FURTHER INFORMATION CONTACT:

Jennifer Hogan, 907–586–7228.

SUPPLEMENTARY INFORMATION: NMFS manages the groundfish fishery in the GOA exclusive economic zone according to the Fishery Management Plan for Groundfish of the Gulf of Alaska (FMP) prepared by the North Pacific Fishery Management Council under authority of the Magnuson-Stevens Fishery Conservation and Management Act. Regulations governing fishing by U.S. vessels in accordance with the FMP appear at subpart H of 50 CFR part 600 and 50 CFR part 679.

NMFS closed the directed fishery for pollock in Statistical Area 630 of the GOA under § 679.20(d)(1)(iii) on January 22, 2008 (73 FR 4494, January 25, 2008). The fishery was subsequently reopened on January 25, 2008 and closed on January 27, 2008 (73 FR 5128, January 29, 2008).

NMFS has determined that approximately 2,469 mt of pollock remain in the directed fishing allowance in Statistical Area 630 of the GOA. Therefore, in accordance with § 679.25(a)(1)(i), (a)(2)(i)(C) and (a)(2)(iii)(D), and to fully utilize the A season allowance of the 2008 TAC of pollock in Statistical Area 630, NMFS is terminating the previous closure and is reopening directed fishing for pollock in Statistical Area 630 of the GOA. In accordance with § 679.20(d)(1)(iii), the Regional Administrator finds that this directed fishing allowance will be reached after 48 hours. Consequently, NMFS is prohibiting directed fishing for pollock in Statistical Area 630 of the GOA for 48 hours, effective 1200 hrs, A.l.t., February 25, 2008.

Classification

This action responds to the best available information recently obtained from the fishery. The Assistant Administrator for Fisheries, NOAA (AA), finds good cause to waive the requirement to provide prior notice and opportunity for public comment pursuant to the authority set forth at 5 U.S.C. 553(b)(B) and 50 CFR 679.25(c)(1)(ii) as such requirement is impracticable and contrary to the public interest. This requirement is impracticable and contrary to the public interest as it would prevent NMFS from responding to the most recent fisheries

data in a timely fashion and would delay the opening of pollock in Statistical Area 630 of the GOA. NMFS was unable to publish a notice providing time for public comment because the most recent, relevant data only became available as of February 20, 2008.

The AA also finds good cause to waive the 30-day delay in the effective date of this action under 5 U.S.C. 553(d)(3). This finding is based upon the reasons provided above for waiver of prior notice and opportunity for public comment.

Without this inseason adjustment, NMFS could not allow the fishery for pollock in Statistical Area 630 of the GOA to be harvested in an expedient manner and in accordance with the regulatory schedule. Under § 679.25(c)(2), interested persons are invited to submit written comments on this action to the above address until March 7, 2008.

This action is required by § 679.20 and § 679.25 and is exempt from review under Executive Order 12866.

Authority: 16 U.S.C. 1801 *et seq.*

Dated: February 21, 2008.

Alan D. Risenhoover

RIN 0648–XD69

Fisheries of the Exclusive Economic Zone Off Alaska; Bering Sea and Aleutian Islands; Final 2008 and 2009 Harvest Specifications for Groundfish

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Final rule; closures.

SUMMARY: NMFS announces final 2008 and 2009 harvest specifications and prohibited species catch allowances for the groundfish fishery of the Bering Sea and Aleutian Islands management area (BSAI). This action is necessary to establish harvest limits for groundfish during the 2008 and 2009 fishing years and to accomplish the goals and objectives of the Fishery Management Plan for Groundfish of the Bering Sea

and Aleutian Islands Management Area (FMP). The intended effect of this action is to conserve and manage the groundfish resources in the BSAI in accordance with the Magnuson-Stevens Fishery Conservation and Management Act.

DATES: The final 2008 and 2009 harvest specifications and associated apportionment of reserves are effective at 1200 hrs, Alaska local time (A.l.t.), February 26, 2008, through 2400 hrs, A.l.t., December 31, 2009.

ADDRESSES: Copies of the Final Alaska Groundfish Harvest Specifications Environmental Impact Statement (EIS), Record of Decision (ROD), Supplementary Information Report (SIR) to the EIS, and Final Regulatory Flexibility Analysis (FRFA) prepared for this action are available on the Alaska Region Web site at <http://www.fakr.noaa.gov>. Printed copies can be obtained from the Alaska Region, NMFS, P.O. Box 21668, Juneau, AK 99802, Attn: Ellen Sebastian. Copies of the 2007 Stock Assessment and Fishery Evaluation (SAFE) report for the groundfish resources of the Bering Sea and Aleutian Islands management area (BSAI) dated November 2007, are available from the North Pacific Fishery Management Council, West 4th Avenue, Suite 306, Anchorage, AK 99510–2252, phone 907–271–2809, or from its Web site at <http://www.fakr.noaa.gov/npfmc>.

FOR FURTHER INFORMATION CONTACT:

Mary Furuness, 907–586–7228, or e-mail mary.furuness@noaa.gov.

SUPPLEMENTARY INFORMATION: Federal regulations at 50 CFR part 679 implement the FMP and govern the groundfish fisheries in the BSAI. The North Pacific Fishery Management Council (Council) prepared the FMP, and NMFS approved it under the Magnuson-Stevens Fishery Conservation and Management Act (Magnuson-Stevens Act). General regulations governing U.S. fisheries also appear at 50 CFR part 600.

The FMP and its implementing regulations require NMFS, after consultation with the Council, to specify the total allowable catch (TAC) for each target species and for the “other species” category, and the sum must be within the optimum yield (OY) range of 1.4 million to 2.0 million metric tons (mt) (see 50 CFR (679.20(a)(1)(i)). NMFS also must specify apportionments of TACs, Community Development Quota (CDQ) reserve amounts, prohibited species catch (PSC) allowances, and prohibited species quota (PSQ) reserve amounts. The final harvest specifications listed in Tables 1 through 16 of this action satisfy these

requirements. The sum of TACs for 2008 is 1,838,345 mt and for 2009 is 1,814,204 mt.

Section 679.20(c)(3) further requires NMFS to consider public comment on the proposed annual TACs and apportionments thereof and the proposed PSC allowances, and to publish final harvest specifications in the **Federal Register**. The proposed 2008 and 2009 harvest specifications and PSC allowances for the groundfish fishery of the BSAI were published in the **Federal Register** on December 6, 2007 (72 FR 68833). Comments were invited and accepted through January 7, 2008. NMFS received two letters with several comments on the proposed harvest specifications. These comments are summarized and responded to in the Response to Comments section of this rule. NMFS consulted with the Council on the final 2008 and 2009 harvest specifications during the December 2007 Council meeting in Anchorage, AK. After considering public comments, as well as biological and economic data that were available at the Council’s December meeting, NMFS is implementing the final 2008 and 2009 harvest specifications as recommended by the Council.

Acceptable Biological Catch (ABC) and TAC Harvest Specifications

The final ABC levels are based on the best available biological and socioeconomic information, including projected biomass trends, information on assumed distribution of stock biomass, and revised technical methods used to calculate stock biomass. In general, the development of ABCs and overfishing levels (OFLs) involves sophisticated statistical analyses of fish populations and is based on a successive series of six levels, or tiers, of the reliability of the information available to fishery scientists. Tier 1 represents the highest level of data quality available and tier 6 the lowest.

In December 2007, the Scientific and Statistical Committee (SSC), Advisory Panel (AP), and Council reviewed current biological information about the condition of the BSAI groundfish stocks. The Council’s Plan Team compiled and presented this information in the 2007 SAFE report for the BSAI groundfish fisheries, dated November 2007. The SAFE report contains a review of the latest scientific analyses and estimates of each species’ biomass and other biological parameters, as well as summaries of the available information on the BSAI ecosystem and the economic condition of groundfish fisheries off Alaska. The SAFE report is available for public review (see
