

in the next draft of the Staff Paper. The risk analysis will be performed to assist in the preparation of the OAQPS Staff Paper, which is to evaluate the policy implications of the key scientific and technical information contained in the Air Quality Criteria document and identify critical elements that EPA staff believe should be considered in reviewing the NAAQS. The Staff Paper is intended to "bridge the gap" between the scientific review contained in the Air Quality Criteria document and the public health and welfare policy judgments required of the Administrator in reviewing the NAAQS.

The draft PM Risk Analysis Methodology will be reviewed at an upcoming public teleconference of the Clean Air Scientific Advisory Committee (CASAC) of EPA's Science Advisory Board. A future **Federal Register** notice will inform the public of the date and details of that meeting. Following the CASAC meeting, EPA will revise the draft Risk Analysis Methodology taking into account public and CASAC comments, and proceed with the risk analyses.

DATES: Comments must be provided on or before February 27, 2002.
