The OMB is particularly interested in comments which:

- Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;
- Evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;
- Enhance the quality, utility, and clarity of the information to be collected; and minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, e.g., permitting electronic submission of responses.

Type of Review: Revision of a currently approved collection.

Agency: Bureau of Labor Statistics (BLS).

Title: Point of Purchase Survey.

OMB Number: 1220-0044.

Affected Public: Individuals or households.

Frequency: Quarterly.

Number of Respondents: 25,060.

Number of Annual Responses: 57,280.

Estimated Time Per Response: 11 minutes.

Total Burden Hours: 10,475.

Total Annualized Capital/Startup Costs: \$0.

Total Annual Costs (operating/maintaining systems or purchasing services): \$0.

Description: Section 2 of Title 29, Chapter 1, Subchapter 1, United States Code Annotated directs the Bureau of Labor Statistics (BLS), under the direction of the Secretary of Labor, to collect, collate, and report full and complete statistics of the conditions of labor and the products and distribution of the products of the same. The Census Bureau conducts the Telephone Point-of-Purchase Survey (TPOPS) for the BLS as part of the Consumer Price Index program. This survey is used to develop and maintain a timely list of retail, wholesale, and service establishments at which urban consumers shop for specified items. The survey results also provide the BLS with basic expenditure estimates that are used to weight unique items that are priced. Without this information, the BLS would not have a statistically accurate list of current establishments visited by consumers,

and therefore, could neither collect prices as needed for the CPI nor weight specific items properly.
