

Periods. No human remains were found during this excavation. UMMAA archeologists also conducted an excavation of the site in 1966. They collected the human remains of a child, buried in a tightly flexed position, along with turtle and fish bones. No date or time period could be established for the human remains. No known individuals were identified. The 1 associated funerary object present is 1 lot of turtle and fish bones.

In 1923, human remains representing, at minimum, four individuals were removed from the Schmidt 2-4 site (20BY1) in Bay County, MI. A landowner donated these human remains and objects to the UMMAA on an unknown date. The human remains are of 1 child, 1 adolescent possibly male, 1 young adult female, and 1 adult male. No date or time period could be established for the human remains. No known individuals were identified. The 1 associated funerary object present is 1 lot of unworked stones, fossil coral, and animal bone.

In the summer of 1963, human remains representing, at minimum, two individuals were removed from the Mahoney Property site (20SA193) in Saginaw County, MI. UMMAA archeologists collected the human remains as part of a survey project conducted in the area. The human remains are sun-bleached and highly weathered, and are from 1 adult and 1 cremated adult. No date or time period could be established for the human remains. No known individuals were identified. No associated funerary objects are present.

#### Determinations Made by the University of Michigan

Officials of the University of Michigan have determined that:

- Pursuant to 25 U.S.C. 3001(9), the human remains described in this notice are Native American based on cranial morphology, dental traits, archeological context, and accession documentation.

- Pursuant to 25 U.S.C. 3001(9), the human remains described in this notice represent the physical remains of eight individuals of Native American ancestry.

- Pursuant to 25 U.S.C. 3001(3)(A), the 2 objects described in this notice is reasonably believed to have been placed with or near individual human remains at the time of death or later as part of the death rite or ceremony.

- Pursuant to 25 U.S.C. 3001(2), a relationship of shared group identity cannot be reasonably traced between the Native American human remains and associated funerary objects and any present-day Indian tribe.

- According to final judgments of the Indian Claims Commission or the Court of Federal Claims, the land from which the Native American human remains and associated funerary objects were removed is the aboriginal land of the Saginaw Chippewa Indian Tribe of Michigan.

- Treaties, Acts of Congress, or Executive Orders, indicate that the land from which the Native American human remains and associated funerary objects were removed is the aboriginal land of The Invited and Consulted Tribes.

- Pursuant to 43 CFR 10.11(c)(1), the disposition of the human remains and associated funerary objects may be to The Invited and Consulted Tribes.

#### Additional Requestors and Disposition

Representatives of any Indian tribe or Native Hawaiian organization not identified in this notice that wish to request transfer of control of these human remains and associated funerary objects should submit a written request with information in support of the request to Dr. Ben Secunda, NAGPRA Project Manager, University of Michigan Office of Research, 4080 Fleming Building, 503 S. Hereafter, all tribes listed in this section are referred to as "The Invited and Consulted Tribes."

#### History and Description of the Remains

In 1958, human remains representing, at minimum, one individual were removed from the GL-1279 site (20SC7) in St. Clair County, MI. An amateur collector removed the human remains of a child from an area near Gratiot Avenue, along Lake Huron, near the start of the St. Clair River. The collections were later donated to the UMMAA on January 19, 1959. UMMAA records note that the GL-1279 (20SC7) site is part of the northern edge of the 20SC8 site, which consists of 21

mounds that populate a 2-mile area along the St. Clair River. The 20SC8 site has been dated to the Woodland Period (850 B.C.–A.D. 1400). Given the association between the 20SC7 and 20SC8 sites, the remains from the GL-1279 site have been dated to the Woodland Period. No known individuals were identified. No associated funerary objects are present.
