SUPPLEMENTARY INFORMATION:

I. Abstract

The 2004 Census Test is part of an extended test cycle leading up to the next decennial census. This testing cycle is an opportunity to evaluate new methods, procedures, systems, questions, and instructions designed to improve coverage and data quality in order to select the most promising ones for use in Census 2010.

The test will be conducted in two sites—Queens, NY, and three rural counties in Georgia (Colquitt, Tift, and Thomas)—and will use two modes for data collection (paper and a Mobile Computing Device [MCD]). The 2004 Census Test will include an array of data collection, data capture, and data processing operations along with the associated support activities necessary for obtaining the data required for evaluation. No prototype data products or counts will be published.

The Census Bureau also will conduct a two-part assessment (the Race and Hispanic/Latino Response Evaluation) in conjunction with the 2004 Census Test. In the first part of the assessment, enumerator taping assistants (ETAs) will

accompany enumerators during Nonresponse Followup ([NRFU]—See Definition of Terms) in order to record enumerator behavior and respondent reaction to the race and Hispanic questions. The second part will consist of telephone re-interviews. The Race and Hispanic/Latino Response Evaluation is scheduled to begin during the NRFU phase of the 2004 Census Test.

Our experience in Census 2000 taught us important lessons emphasizing the need to begin planning and development early in the decade. Consequently, the Census Bureau established a number of Census 2010 Planning Groups to investigate potential changes for the next decennial census. As part of the development cycle, the 2004 Census Test will evaluate the effectiveness of:

1. Methodological innovations (*e.g.*, changes in the residence rule instructions—*See Definition of Terms*),
2. Content modifications (*e.g.*, changes in the race and Hispanic origin questions and response categories, as well as dropping the “Some other race” option), and
3. Incorporation of evolving technologies (using an MCD for data collection during NRFU).

The Race and Hispanic/Latino Response Evaluation is intended to evaluate personal visit respondent reactions to removing the “Some other race” category. The primary vehicle for this evaluation will combine the ETA interviews taped as part of the personal visits during 2004 NRFU with the 2003 National Census Test results.

Approximately 175,000 housing units in the test sites will receive a census form by mail. These housing units are expected to complete these forms and mail them back (mailout/mailback universe, *i.e.* housing units that have city-style addresses such as 806 Main Street). Additionally, enumerators will deliver a form to approximately 25,000 housing units that have non city-style addresses such as Rt. 7, Box 433. These housing units are asked to complete the forms and mail them back (update/leave universe).

Beginning in June 2004, a sample of approximately 2,800 households in the Queens, NY site will be re-interviewed via telephone for the Hispanic/Latino Response Evaluation. (Although the Behavior Coding segment of the test will involve about 2,000 households, it will not involve an increase in respondent burden, since the coding will be done as the NRFU interview is conducted.)
