

The MMPA states that the term “take” means to harass, hunt, capture, kill or attempt to harass, hunt, capture, or kill any marine mammal.

Except with respect to certain activities not pertinent here, the MMPA defines “harassment” as: any act of pursuit, torment, or annoyance, which (i) has the potential to injure a marine mammal or marine mammal stock in the wild (Level A harassment); or (ii) has the potential to disturb a marine mammal or marine mammal stock in the wild by causing disruption of behavioral patterns, including, but not limited to, migration, breathing, nursing, breeding, feeding, or sheltering (Level B harassment).

### Summary of Request

On September 12, 2024, NMFS received an application from Hilcorp requesting authorization for take of marine mammals incidental to construction activities associated with sea ice road and trail activities at Northstar Production Facility (Northstar), Spy Island Drillsite (SID), and Oooguruk Drillsite (ODS) located in coastal Beaufort Sea waters off of the north slope of Alaska. We provided comments on the application and Hilcorp submitted a revised version on April 3, 2025. The application was deemed adequate and complete on May 5, 2025. The requested regulations under which we would issue the requested Letter of Authorization (LOA) would be valid for 5 years, December 2025 through November 2030. During the ice-covered season, Hilcorp annually constructs sea ice roads and trails to connect and allow access between West Dock and Northstar. Similarly, Hilcorp builds and utilizes an ice road or trail connecting the Oliktok Production Pad (OPP) and SID and also builds an annual ice road from shore to the ODS. Construction activities and subsequent use and maintenance of ice roads and trails are expected to disturb nearby pinnipeds, potentially resulting in incidental take by Level B harassment or mortality. Therefore, Hilcorp requests authorization to incidentally take marine mammals. This would be the second rule covering the activities described below. The current regulations and associated LOA are effective from December 22, 2020 through November 30, 2025.

### Specified Activities

The purpose of Hilcorp’s activities is to transport personnel, equipment and provisions to the off-shore Northstar, SID and ODS production facilities during the winter months when the ocean surface is frozen. The proposed

activities would include the building and maintenance of ice roads, ice trails and adjacent ice pads. Sea ice road construction activities occur 24 hours a day, 7 days a week during the construction phase (approximately 6 weeks), and are halted during unsafe conditions such as high winds or extremely low temperatures. After the roads are completed, Hilcorp would need to conduct maintenance activities anytime, day or night, in order to maintain a safe route of travel. Ice road and trail activities would occur between December 1 and May 31 each year between 2025 and 2030, depending on weather and ice conditions. Take by Level B harassment along with the limited potential for mortality (four instances over 5 years) has been requested for ringed seal (*Phoca hispida*). The Hilcorp application contains mitigation and monitoring measures designed to reduce impacts to marine mammals. The application also contains proposed marine mammal monitoring and reporting plans.

### Information Solicited

Interested persons may submit information, suggestions, and comments concerning Hilcorp’s request (see **ADDRESSES**). NMFS will consider all information, suggestions, and comments related to the request during the development of proposed regulations governing the incidental taking of marine mammals by Hilcorp, if appropriate.
