The Fleet Management Order adopts a procedure that will give operators the flexibility to operate satellites in their fleets at any one of their orbit locations assigned to their fleet without individual prior Commission approval. In addition, the Order adopts a rule that permits receive-only earth stations to access foreign-licensed satellites on the "Permitted List." The Order adopts a streamlined procedure for minor modifications of space station licenses in section 25.118(e) of the Commission's rules and it eliminates a licensing requirement for certain receive-only stations. The Commission's adoption of a streamlined procedure for minor modifications of space station licenses expedites the grant of applications that do not involve increase interference potential and facilitates service to the public. Under this new streamlined procedure, a space station operator may modify its license without prior authorization, but upon 30 days prior notice to the Commission and any potentially affected licensed

spectrum user, provided that the operator meets the certain technical requirements. The Commission uses this information to determine the technical, legal and financial qualifications of applicants or licensees to operate a station, transfer or assign a license, and to determine whether the authorization is in the public interest, convenience and necessity.
