

of the total population, then monitor all of the valves in all verification zones. Additionally, monitor a random sample of additional valves within the LDSN but outside of the verification zones, chosen in accordance with IV.E (a)(2)(v), until the 20 percent minimum is achieved.

(v) Random sampling of valves. To determine the random selection of valves to monitor, determine the population of valves that must be randomly sampled as determined in IV.E(a)(2)(ii), (iii), or (iv) (*i.e.*, 20 percent of the total valve population or 20 percent of the total valve population minus the number of valves in the verification zones). Divide the population of valves by the number of valves that must be sampled and round to the nearest integer to establish the sampling interval. Using the valve IDs sequentially, monitor valves at this sequential interval (*e.g.*, every 5 valves). Alternatively, use the valve IDs and a random number generator to determine the valves to monitor. Each survey conducted under IV.E(a)(1) must start on a different valve ID such that the same population of valves is not monitored in each survey.

(3) Monitor each pump located in the process unit using EPA Method 21 as specified in section 60.485a(b) of 40 CFR part 60, subpart VVa.

(4) For purposes of this monitoring, a leak is identified as an instrument reading above the leak definitions in Table 2 of this AMEL. All identified leaks must be repaired within 15 calendar days of detection, with a first attempt completed within five calendar days of detection.

(5) If any components are identified with EPA Method 21 screening values above 18,000 ppm, the LDSN is not in compliance with the approved AMEL, except components under current investigations in an active PSL with screening values above 18,000 ppm may be excluded provided the PSL has been open for less than 14 days or the components have been identified and placed on delay of repair. The period of noncompliance with the AMEL extends until the actions in IV.E(5)(i)–(ii) are completed and the actions in IV.E(5)(iii) result in all components identified with EPA Method 21 to have screening values less than or equal to 18,000 ppm.

(i) Within 30 days of the survey conducted in IV.E(a)(4), which identifies components with EPA Method 21 screening values above 18,000 ppm, FHR must submit a plan to revise the sensor network to *CCG-AWP@epa.gov*. Revisions to the sensor network must include the addition of new sensors to reduce the detection radius of

each sensor, location changes of any previously deployed sensors, and/or the deployment of a different sensor type. The plan must also include the location of the controlled release specified in IV.E(a)(5)(ii) to verify the performance of the revised network.

(ii) Within 30 days of completing the approved sensor network changes, FHR must conduct a controlled release of 1.4 g/hr isobutylene to determine the performance of the network.

(iii) Within 60 days of completing the approved sensor network changes, FHR must repeat the actions in IV.E(a)(2) through (a)(4). If any components are identified with EPA Method 21 screening values above 18,000 ppm, FHR remains in noncompliance with the approved AMEL, and FHR must repeat the actions required in IV.E(a)(5)(i) and (ii).

(b) FHR may stop conducting the additional annual compliance demonstration required in IV.E(a) if no leaks above 18,000 ppm are identified with Method 21 of appendix A–7 of part 60 over a period of 2 consecutive calendar years.

V. Request for Comments

The EPA solicits comment on all aspects of this AMEL request. We specifically seek comment regarding whether the proposed alternative LDAR requirements listed in Section IV of this preamble would be adequate for ensuring the LDSN–DRF will achieve detection and location of component-level leaks. Additionally, we seek comment regarding whether the proposed alternative will achieve emissions reductions at least equivalent to the emissions reductions that would be achieved through compliance with the applicable LDAR requirements in 40 CFR 60 Subparts VV, VVa, GGG, GGGa; 63 Subparts H and CC. Finally, as noted in Section III, we also solicit comment on the EPA's proposed framework for evaluation of future LDSN–DRF AMEL requests. Commenters should include data or specific examples in support of their comments.

Panagiotis Tsirigotis,

Director, Office of Air Quality Planning and Standards.

FEDERAL MARITIME COMMISSION

National Shipper Advisory Committee October 2021 Meeting

AGENCY: Federal Maritime Commission.

ACTION: Notice of Federal Advisory Committee meeting.

SUMMARY: Notice is hereby given of a meeting of the National Shipper Advisory Commission (NSAC), pursuant to the Federal Advisory Committee Act.

DATES: The Committee will meet by video conference on October 27, 2021, from 1:00 p.m. until 4:00 p.m. Eastern. Please note that this meeting may adjourn early if the Committee has completed its business.

ADDRESSES: The meeting will be held via video conference. The link will be provided by email to registrants in advance. Requests to register should be submitted to nsac@fmc.gov and contain “REGISTER FOR NSAC MEETING” in the subject line. The deadline for members of the public to register to attend the meeting is by 5:00 p.m. Eastern on Friday, October 22. Members of the public are encouraged to submit registration requests via email in advance of the deadline. The number of lines may be limited and will be available on a first-come, first-served basis. If you have accessibility concerns and require assistance, contact secretary@fmc.gov.

FOR FURTHER INFORMATION CONTACT: Mr. Dylan Richmond, Designated Federal Officer of the National Shipper Advisory Committee, phone: (202) 523–5810; email: drichmond@fmc.gov.

SUPPLEMENTARY INFORMATION:

Background: The National Shipper Advisory Committee is a federal advisory committee. It operates under the provisions of the Federal Advisory Committee Act, 5 U.S.C. App., and 46 U.S.C. chapter 425. The Committee was established on January 1, 2021, when the National Defense Authorization Act for Fiscal Year 2021 became law. Public Law 116–283, section 8604, 134 Stat. 3388 (2021). The Committee will provide information, insight, and expertise pertaining to conditions in the ocean freight delivery system to the Commission. Specifically, the Committee will advise the Federal Maritime Commission on policies relating to the competitiveness, reliability, integrity, and fairness of the international ocean freight delivery system. 46 U.S.C. 42502(b).

The purpose of the meeting is for the Committee to organize itself and to begin discussions on issues of interest to the agency. Potential agenda items include remarks from Federal Maritime Commission leadership, the election of a Chair and Vice-Chair, and roundtable discussions on detention and demurrage, information sharing, and

current observations of the state of the supply chain.

Written Comments: Members of the public may submit written comments to NSAC at any time. Comments would be most useful to the Committee if they address the objectives outlined in their charter. Comments should be addressed to NSAC, c/o Dylan Richmond, Federal Maritime Commission, 800 North Capitol St. NW, Washington, DC 20573 or nsac@fmc.gov.

A copy of all meeting documentation will be available at www.fmc.gov following the meeting.

By the Commission.

Rachel E. Dickon,
Secretary.
