

providers already offer some of these services. However, mobile service providers may have to review and adjust their current alert systems to ensure compliance with these requirements. In addition, the Commission's proposed rules may require mobile providers to include information regarding how to request and use any usage controls and monitoring tools that they currently offer in the service providers' bills or in annual bill inserts. This would necessitate providing additional information to consumers via the monthly bill or an annual bill insert.

Steps Taken To Minimize Significant Economic Impact on Small Entities, and Significant Alternatives Considered

The RFA requires an agency to describe any significant alternatives that it has considered in reaching its proposed approach, which may include the following four alternatives (among others): (1) The establishment of differing compliance or reporting requirements or timetables that take into account the resources available to small entities; (2) the clarification, consolidation, or simplification of compliance or reporting requirements under the rule for small entities; (3) the use of performance, rather than design, standards; and (4) an exemption from coverage of the rule, or any part thereof, for small entities.

In document FCC 10–180, the Commission seeks comment on the costs for small providers to implement usage alerts including whether there is a need for varying implementation schedules between the larger and smaller providers to alleviate the burden for smaller providers. In addition, the Commission seeks comment on whether the Commission should consider exempting the smaller providers from any usage alert or roaming notification requirement due to the costs such a requirement might impose on them. In reviewing the frequency of mandatory usage alerts, the Commission seeks comment on the utility of providing multiple usage alerts to the consumer against the potential burdens to the wireless providers particularly smaller providers—who must supply them. Finally, the Commission seeks comment on the best methods to minimize costs for smaller, regional and/or rural mobile providers while ensuring their customers have access to information relating to any methods to monitor or set limits on usage offered by their service provider.
