The scope includes steel wheels, discs, and rims of carbon and/or alloy composition and clad wheels, discs, and rims when carbon or alloy steel represents more than fifty percent of the product by weight. The scope includes wheels, rims, and discs, whether coated or uncoated, regardless of the type of coating.

Research authorized under Permit No. 15672 would characterize the distribution, movements and dive behavior of leatherback sea turtles in the waters of New England. This research would inform our understanding of leatherback habitat utilization, foraging behavior, and threats posed by entanglement risk. Researchers propose to conduct research on up to 30 leatherback sea turtles annually. Researchers would use animals that have been disentangled from fishing gear by the stranding network or they

would capture the animals using a breakaway hoopnet. Turtles would be measured, weighed, photographed and videotaped, flipper and passive integrated transponder tagged, blood, tissue, and fecal sampled, cloacal, oral, and nasal swabbed, tagged with an electronic transmitter, and released. The permit would be issued for 5 years.
