

4.0 Conclusion for Part 73 Schedule Exemption Request

The NRC staff has reviewed the licensee's submittal and concludes that the licensee has provided adequate justification for its request for an extension of the previously authorized compliance date from October 31, 2010, to February 28, 2011, for one specific requirement. This conclusion is based on the staff's determination that SCE has made a good faith effort to meet the requirements in a timely manner, has sufficiently described the reasons for the unanticipated delays, and has provided an updated detailed schedule with adequate justification for the additional time requested for the extension, based on those delays and an expansion to the original scope of work that the staff agrees is needed to ensure that required system capabilities are met.

Accordingly, the Commission has determined that pursuant to 10 CFR 73.5, "Specific exemptions," an exemption to further extend the March 31, 2010, compliance date is authorized by law and will not endanger life or property or the common defense and security, and is otherwise in the public interest. Therefore, the Commission hereby grants the requested exemption.

The NRC staff has determined that the long-term benefits that will be realized when the SONGS security modifications are completed justifies exceeding the full compliance date with regard to the specified requirements of 10 CFR 73.55. The significant security enhancements SONGS needs additional time to complete are new requirements imposed by March 27, 2009, amendments to 10 CFR 73.55, and are in addition to those required by the security orders issued in response to the events of September 11, 2001. Therefore, the NRC concludes that the licensee's actions are in the best interest of protecting the public health and safety through the security changes that will result from granting this exemption.

As per the licensee's request and the NRC's regulatory authority to grant an exemption from the March 31, 2010, deadline for the one remaining item specified in Enclosure 1 of SCE's letters dated August 24 and October 17, 2010, the licensee is required to be in full compliance by February 28, 2011. In achieving compliance, the licensee is reminded that it is responsible for determining the appropriate licensing mechanism (i.e., 10 CFR 50.54(p) or 10 CFR 50.90) for incorporation of all necessary changes to its security plans.

Pursuant to 10 CFR 51.32, "Finding of no significant impact," the Commission has previously determined that the

granting of this exemption will not have a significant effect on the quality of the human environment (75 FR 69136; November 10, 2010).

This exemption is effective upon issuance.

NUCLEAR REGULATORY COMMISSION

[Docket No. 50-320; License No. DPR-73; NRC-2010-0358]

Receipt of Request for Action Under 10 CFR 2.206

Notice is hereby given that by petition dated September 30, 2010, Mr. Eric J. Epstein has requested that pursuant to Title 10 of the Code of Federal Regulations (10 CFR), Section 2.206, "Requests for Action under this Subpart," the U.S. Nuclear Regulatory Commission (NRC) take action with regard to the Three Mile Island Unit-2 (TMI-2) Nuclear Power Station. Mr. Epstein requests that the Commission take enforcement action in the form of a Demand for Information from FirstEnergy relating to inadequate financial assurance provided by the licensee for TMI-2's nuclear decommissioning fund prior to the consummation of FirstEnergy's proposed merger with Allegheny Energy. As the basis for this request, the petitioner states that the current radiological decommissioning cost estimate is \$831.5 million and the current amount in the decommissioning trust fund is \$484.5 million, as of December 31, 2008. Further, the petitioner states that FirstEnergy's decommissioning report is inadequate,

and fails to account for the special status of TMI-2, the current level of underfunding, or the fact that decommissioning rate recovery for Metropolitan Edison and Pennsylvania Electric cease per Pennsylvania Public Utility Commission Orders on December 31, 2010.

The request is being treated pursuant to 10 CFR 2.206 of the Commission's regulations. The request has been referred to the Director of the Office of Federal and State Materials and Environmental Management Programs (FSME). As provided by 10 CFR 2.206, appropriate action will be taken on this petition within a reasonable time. The petitioner met with FSME's Petition Review Board (PRB), via teleconference, on October 19, 2010, to discuss the petition. The results of that discussion have been considered in the PRB's determination regarding the petitioner's request for additional information from FirstEnergy and in establishing the schedule for the review of the petition.

Copies of the petition are available to the public from the NRC's Agencywide Documents Access and Management System (ADAMS) in the public Electronic Reading Room on the NRC Web site at <http://www.nrc.gov/reading-rm/adams.html> under ADAMS Accession No. ML102770308, and are available for inspection at the Commission's Public Document Room, located at One White Flint North, 11555 Rockville Pike (first floor), Rockville, Maryland.
