### SUPPLEMENTARY INFORMATION:

The NRC is issuing for public comment a draft regulatory guide in the agency's "Regulatory Guide" series. This series was developed to describe and make available to the public such information as methods that are acceptable to the NRC staff for implementing specific parts of the NRC's regulations, techniques that the staff uses in evaluating specific problems or postulated accidents, and data that the staff needs in its review of applications for permits and licenses.

The draft regulatory guide is temporarily identified by its task number, DG-5020, which should be mentioned in all related correspondence. The DG-5020 is a proposed new regulatory guide.

This guide describes methods that the staff or NRC considers acceptable for licensees and certificate holders to comply with the Commission's regulations implementing the provisions of Section 161A, "Use of Firearms by Security Personnel," of the Atomic Energy Act of 1954, as amended (42 U.S.C. 2201a), that are found in the proposed 10 CFR 73.18 and 10 CFR 73.19. See the proposed rule (Docket ID: NRC-2011-0018) published elsewhere in today's **Federal Register**.

Section 161A provides authority for the Commission to designate classes of facilities, radioactive material, and other property, as appropriate, for licensees and certificate holders to (1) transfer, receive, possess, transport, import, and use enhanced weapons and (2) preempt

State, local, and certain Federal firearms laws (including regulations). In addition, Section 161A mandates that each security officer complete a satisfactory fingerprint-based firearms background check by the U.S. Attorney General for designated classes of facilities, radioactive material, and other property, where the affected licensee's or certificate holder's protective strategy employs firearms and the officer's official duties require access to any covered weapon. The NRC is issuing DG-5020 for comment in conjunction with DG-5019, "Reporting and Recording Safeguards Events," and the associated proposed rule. See the DG-5019 (Docket ID: NRC-2011-0014) proposed elsewhere in today's **Federal Register**.

**AGENCY:** Nuclear Regulatory  
Commission.

**ACTION:** Notice of availability and  
request for public comment.

**SUMMARY:** The U.S. Nuclear Regulatory Commission (Commission or NRC) is seeking input from the public, licensees, certificate holders, and other stakeholders on a draft guidance document entitled "Weapons Safety Assessment" (WSA). A completed WSA would be part

of an application to the NRC for the use for enhanced weapons.

The Commission is authorized under Section 161A of the Atomic Energy Act of 1954, as amended (AEA), to approve licensees' and certificate holders' possession of enhanced weapons as part of a protective strategy for defending NRC-regulated facilities and radioactive material against malevolent acts. Volumes 1 through 3 of the draft WSA are being issued for public review and comment.

**DATES:** Submit comments on Volumes 1 through 3 of the draft WSA by May 4, 2011. Comments received after this date will be considered if it is practical to do so, but the NRC is able to ensure consideration only for comments received on or before this date.

#### **SUPPLEMENTARY INFORMATION:**

On August 8, 2005, President Bush signed into law the Energy Policy Act of 2005 (EPAct), Public Law 109-58, 119 Stat. 594 (2005). Section 653 of the EPAct amended the AEA by adding Section 161A, "Use of Firearms by Security Personnel" (42 U.S.C. 2201a). Section 161A of the AEA provides the NRC with new authority that will enhance security at designated facilities of NRC licensees and certificate holders. Section 161A also provides the NRC with new authority that will enhance security with respect to the possession or use of certain radioactive material or other property owned or possessed by an NRC licensee or certificate holder, or the transportation of such material or other property that has been determined by the Commission to be of significance
