Title: Approval of State Coastal Nonpoint Pollution Control Programs (Renewal).

ICR numbers: EPA ICR No. 1569.07, OMB Control No. 2040-0153.

ICR Status: This ICR is scheduled to expire on 01/31/2010. Under OMB regulations, the Agency may continue to conduct or sponsor the collection of information while this submission is pending at OMB. An Agency may not conduct or sponsor, and a person is not required to respond to, a collection of information, unless it displays a currently valid OMB control number. The OMB control numbers for EPA's regulations in title 40 of the CFR, after appearing in the **Federal Register** when approved, are listed in 40 CFR part 9, are displayed either by publication in the **Federal Register** or by other appropriate means, such as on the related collection instrument or form, if applicable. The display of OMB control numbers in certain EPA regulations is consolidated in 40 CFR part 9.

Abstract: Under the provisions of national Program Development and Approval Guidance implementing section 6217 of the Coastal Zone Act Reauthorization Amendments of 1990 (CZARA) which was jointly developed and published by EPA and the National Oceanic and Atmospheric Administration (NOAA), 29 coastal States and 5 coastal Territories with Federally approved Coastal Zone Management Programs have developed and submitted to EPA and NOAA Coastal Nonpoint Pollution Programs. EPA and NOAA have fully approved 16 States and 5 Territories, and conditionally approved 13 States. The conditional approvals will require States and Territories to submit additional information in order to obtain final program approval. CZARA section 6217 requires States and Territories to obtain final approval of their Coastal Nonpoint Pollution Programs in order to retain their full share of funding available to them under section 319 of the Clean Water Act and section 306 of the Coastal Zone Management Act.

Burden Statement: The annual public reporting and recordkeeping burden for this collection of information is estimated to average 125 hours per response. Burden means the total time, effort, or financial resources expended by persons to generate, maintain, retain, or disclose or provide information to or for a Federal agency. This includes the time needed to review instructions; develop, acquire, install, and utilize technology and systems for the purposes of collecting, validating, and verifying information, processing and

maintaining information, and disclosing and providing information; adjust the existing ways to comply with any previously applicable instructions and requirements which have subsequently changed; train personnel to be able to respond to a collection of information; search data sources; complete and review the collection of information; and transmit or otherwise disclose the information.

Respondents/Affected Entities: 13 coastal States with conditionally approved Coastal Nonpoint Pollution Control Programs.

Estimated Number of Respondents: 13.

Frequency of Response: On occasion.

Estimated Total Annual Hour Burden: 1,625 hours.

Estimated Total Annual Cost: \$60,125, this includes \$0 annualized capital or O&M costs.

Changes in the Estimates: There is a decrease of 500 hours in the annual estimated burden currently identified in the OMB Inventory of Approved ICR Burdens. This decrease is the result of EPA and NOAA having fully approved 21 of the 34 programs.

Dated: January 11, 2010.

John Moses,

Director, Collection Strategies Division.

Abstract: WaterSense is a voluntary program designed to create self-sustaining markets for water-efficient products and services via a common label. The program provides incentives for manufacturers to design, produce, and market water-efficient products. In addition, the program provides incentives for certified professionals (e.g. certified irrigation auditors, designers, or installation and maintenance professionals) to deliver water-efficient services. The program also encourages consumers and commercial and institutional purchasers of water-using products and systems to choose water-efficient products and engage in water-efficient practices.

As part of strategic planning efforts, EPA encourages programs to develop meaningful performance measures, set ambitious targets, and link budget expenditures to results. Data collected under this ICR will assist the WaterSense program in demonstrating results and evaluating program effectiveness to ensure continual program improvement. In addition, data will help EPA monitor market penetration and inform future product categories and specifications.

Burden Statement: The annual public reporting and recordkeeping burden for this collection of information is estimated to average 19 hours per response for organizational partners, who are not manufacturers and who are not applying for an award. The average burden is 35 hours for manufacturing partners who must also complete New Certified Product Notification Forms.
