

Preliminary Issues

The Forest Service has identified the following preliminary issues including potential effects to aquatic, riparian and water quality, botanical resources, economic feasibility, heritage resources, scenic/visuals/recreation (Pacific Crest Trail), soil resources, watershed condition and wildlife habitat.

Permits or Licenses Required

Smoke permits are required from the Northern Sierra Air Quality Management District prior to any understory or pile burning. Sorting and removing Forest by-products from the site to commercial off-Forest vendors would involve some form of permits for road use, right-of-way, or use of private lands for landings and access.

Scoping Process

This notice of intent initiates the scoping process, which guides the development of the environmental impact statement. A public meeting will be held at the Feather River District Office in Oroville, California on Tuesday, February 1, 2011 from 4:30 p.m. to 7 p.m.

It is important that reviewers provide their comments at such times and in such manner that they are useful to the agency's preparation of the environmental impact statement. Therefore, comments should be provided prior to the close of the comment period and should clearly articulate the reviewer's concerns and contentions. Comments received in response to this solicitation, including names and addresses of those who comment, will be part of the public record for this proposed action. Comments submitted anonymously will be accepted and considered; however. There will be an objection process before the final decision is made and after the final EIS is mailed (36 CFR part 218). In order to be eligible to file an objection to the preferred alternative identified in the final EIS, specific written comments related to the project must be submitted during scoping or any other periods public comment is specifically requested on this EIS (36 CFR 218.5).

Dated: January 19, 2011.
