

NMFS finds this application warrants further consideration based on a preliminary review. Possible conditions the agency may impose on this permit, if it is granted, include but are not limited to, a prohibition on conducting sampling activities within marine protected areas, marine sanctuaries, or special management zones, without additional authorization, and requiring compliance with best practices in the event of interactions with any protected species. NMFS may also require annual reports summarizing the amount of shark-depredated carcasses harvested during the period of effectiveness of any issued EFP. NMFS requires that all federally permitted charter vessels participating under this EFP are compliant with all legal requirements, including the Southeast For-Hire Electronic Reporting Program. Additionally, NMFS would require any sea turtles taken incidentally during the course of the activities to be handled with due care to prevent injury to live specimens, observed for activity, and returned to the water.

A final decision on issuance of the EFP will depend on NMFS' review of public comments received on the application, consultations with the affected state, the South Atlantic Fishery Management Council, and the U.S. Coast Guard, and a determination that it is consistent with all applicable law.

SUPPLEMENTARY INFORMATION:

I. Abstract

This request is for a revision and extension of a currently approved

information collection. The National Oceanic and Atmospheric Administration's Coastal Ocean Program (COP), now known as the Competitive Research Program (CRP) under the National Centers for Coastal Ocean Science, provides direct financial assistance through grants and cooperative agreements for research supporting the management of coastal ecosystems and the NOAA RESTORE Science Program (RSP). The statutory authority for COP is Public Law 102–567 Section 201 (Coastal Ocean Program). NOAA was authorized to establish and administer the Restore Science Program, in consultation with the U.S. Fish and Wildlife Service, by the Resources and Ecosystems Sustainability, Tourist Opportunities, and Revived Economies (RESTORE) of the Gulf States Act of 2012 (Pub. L. 112–141, Section 1604). Identified in the RESTORE Act as the Gulf Coast Ecosystem restoration Science, Observation, Monitoring, and Technology Program, the Program is commonly known as the NOAA RESTORE Science Program. In addition to standard government application requirements, applicants for financial assistance are required to submit a project summary form, current and pending form, and a key contacts form for both programs. CRP recipients are required to file annual progress reports and a project final report using CRP formats. The RSP are required to file semi-annual progress reports, a final report, and a Gantt chart showing project milestones using RSP formats. All of these requirements are needed for better evaluation of proposals and monitoring of awards.

Several revisions are being requested for this information collection. The approved annual and final reports for CRP will be revised to include the request for publication digital object identifiers (DOIs). The RSP semi-annual and final reports will be revised to include end-user details. Finally, the Current and Pending Support form is being updated to require applicants disclose all sources of current and pending research support, contractual or otherwise, direct and indirect, including current and pending private and public sources of funding or income, both foreign and domestic. Other support should include all resources made available to a Covered Person in support of and/or related to all of their professional research and development efforts, including resources provided directly to the Covered Person rather than through the research institution, and regardless of whether they have

monetary value (e.g., even if the support received is only in-kind, such as office/laboratory space, equipment, supplies, or employees). This should include resource and/or financial support from all foreign and domestic entities, including but not limited to, gifts provided with terms or conditions, financial support for laboratory personnel, and participation of student and visiting researchers supported by other sources of funding.

II. Method of Collection

Respondents have a choice of either electronic or paper forms.
