NUCLEAR REGULATORY COMMISSION

[IA-01-022]

In the Matter of Mr. Virgil J. Hood, Jr.; Demand for Information

I

Mr. Virgil J. Hood, Jr. was the Vice President of Moisture Protection Systems Analysts, Inc. (MPSA or the Licensee) formerly located at 1350 Beverly Road, Suite 223, McLean, Virginia 22101. The Licensee was the holder of Byproduct Materials License No. 45-24851-02 (the license), which was issued by the Nuclear Regulatory Commission (NRC or Commission) pursuant to 10 CFR part 30 on June 19, 1986 and renewed on January 30, 1992. The license authorized MPSA to possess byproduct material, i.e., a Seaman Nuclear Corporation Model R-50 portable roofing gauge containing a nominal 40 millicuries (mCi) of Americium-241, for use in measuring moisture density of roof surfaces in accordance with the conditions specified in the license. On April 20, 1998, the Licensee's license was revoked.

II

Between December 31, 1997, and January 31, 2001, the NRC Office of Investigations (OI) conducted an investigation to determine the location of a moisture density gauge containing licensed material after the Licensee failed to pay the NRC annual license fee for fiscal year 1996, and had vacated the premises listed on its license without prior notice to the NRC. These actions by the Licensee had resulted in the NRC issuing an Order Suspending License (Effective Immediately) (Order Suspending License) to MPSA on May 15, 1997. The Order Suspending License imposed certain requirements upon the Licensee and required a response from the Licensee. Subsequently, after the Licensee failed to submit the required answer to the Order Suspending License, a Notice of Violation and Proposed Imposition of Civil Penalty—\$5,500, and Order Modifying Order Suspending License (Effective Immediately) and Order Revoking License (Order Revoking License) were issued to MPSA revoking its license on April 20, 1998. The Order Revoking License required that the Licensee maintain licensed material in safe storage, immediately notify the NRC of its current business location and status of licensed material, test the gauge for leak tightness, and transfer all licensed material to an authorized recipient.
