

FEDERAL RESERVE SYSTEM

Formations of, Acquisitions by, and Mergers of Bank Holding Companies

The companies listed in this notice have applied to the Board for approval, pursuant to the Bank Holding Company Act of 1956 (12 U.S.C. 1841 *et seq.*) (BHC Act), Regulation Y (12 CFR Part 225), and all other applicable statutes and regulations to become a bank holding company and/or to acquire the assets or the ownership of, control of, or the power to vote shares of a bank or bank holding company and all of the banks and nonbanking companies owned by the bank holding company, including the companies listed below.

The applications listed below, as well as other related filings required by the Board, are available for immediate inspection at the Federal Reserve Bank indicated. The application also will be available for inspection at the offices of the Board of Governors. Interested persons may express their views in writing on the standards enumerated in the BHC Act (12 U.S.C. 1842(c)). If the proposal also involves the acquisition of a nonbanking company, the review also includes whether the acquisition of the nonbanking company complies with the standards in section 4 of the BHC Act (12 U.S.C. 1843). Unless otherwise noted, nonbanking activities will be conducted throughout the United States. Additional information on all bank holding companies may be obtained from the National Information Center website at [www.ffiec.gov/nic/](http://www.ffiec.gov/nic/).

Unless otherwise noted, comments regarding each of these applications must be received at the Reserve Bank indicated or the offices of the Board of Governors not later than April 28, 2003.

**A. Federal Reserve Bank of Chicago** (Phillip Jackson, Applications Officer) 230 South LaSalle Street, Chicago, Illinois 60690-1414:

1. *Midwest Banc Holdings, Inc.*, Melrose Park, Illinois; to acquire 100 percent of the voting shares of CoVest Banshares, Inc., Des Plaines, Illinois, and thereby indirectly acquire voting shares of CoVest Banc, National Association, Des Plaines, Illinois.

**B. Federal Reserve Bank of St. Louis** (Randall C. Sumner, Vice President) 411 Locust Street, St. Louis, Missouri 63166-2034:

1. *Pulaski Investment Corporation*, Little Rock, Arkansas; to acquire 100 percent of the voting shares of The Munford Union Bank, Munford, Tennessee.

Board of Governors of the Federal Reserve System, March 28, 2003.

**Robert deV. Frierson**,  
*Deputy Secretary of the Board.*

Proposed Data Collections Submitted for Public Comment and Recommendations

In compliance with the requirement of section 3506(c)(2)(A) of the Paperwork Reduction Act of 1995 for opportunity for public comment on proposed data collection projects, the Centers for Disease Control and Prevention (CDC) will publish periodic summaries of proposed projects. To request more information on the proposed projects or to obtain a copy of the data collection plans and instruments, call the CDC Reports Clearance Officer on (404) 498-1210.

Comments are invited on: (a) Whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information shall have practical utility; (b) the accuracy of the agency's estimate of the burden of the proposed collection of information; (c) ways to enhance the quality, utility, and clarity of the information to be collected; and (d) ways to minimize the burden of the collection of information on respondents, including through the use of automated collection techniques or other forms of information technology. Send comments to Anne O'Connor, CDC Assistant Reports Clearance Officer, 1600 Clifton Road, MS-D24, Atlanta, GA 30333. Written comments should be received within 60 days of this notice.

*Proposed Project:* Assessment of Exposure to Arsenic through Household Water, OMB No. 0920-0472—

Extension—National Center for Environmental Health (NCEH), Centers for Disease Control and Prevention (CDC).

Background

Arsenic is a naturally occurring element present in food and water as both organic and inorganic complexes. Epidemiologic evidence shows a strong link between ingestion of water containing inorganic arsenic and an increase in certain cancers (*e.g.*, bladder cancer, lung cancer). Although consumption of arsenic-contaminated food is the major source of arsenic exposure for the majority of U.S. citizens, in some areas of the United States, elevated levels of arsenic occur frequently in water. In such areas, ingestion of water can be the primary source of arsenic exposure. Currently, point-of-use (POU) devices are the preferred method of treatment of private domestic well water containing elevated levels of arsenic. Bottled water and POU treatment systems are considered effective means of managing arsenic exposure based on the assumption that people's other water exposures, such as bathing, brushing of teeth, cooking, and drinking occasionally from other taps, contribute relatively minor amounts to a person's total daily intake of arsenic. We propose to conduct a study to methodically test the validity of the commonly made assumption that secondary water exposures, such as bathing, will not result in a significant increase in arsenic exposure above background dietary levels. Specifically, we are interested in assessing total urine arsenic levels and levels of organic and inorganic arsenic species among people in areas in which ingestion of arsenic-containing water is controlled by either POU treatment or use of bottled water. Potential participants who are interested in being part of the study will be interviewed by telephone. Recruited participants will be asked to participate in a survey interview about potential exposures to arsenic. Participants in the study will use short-term diaries to record diet, water consumption, and bathing frequency. In addition, we will assess long-term arsenic exposure by analyzing toenail samples for total arsenic.

This request is for a 4-year extension. There are no costs to respondents.

Respondents	Number of respondents	Number of responses per respondent	Average burden per response (in hrs.)	Total burden (in hrs.)
Prescreening postcard completion .....	12,850	1	5/60	1071
Initial recruiting postcard completion .....	2,955	1	5/60	246

Respondents	Number of respondents	Number of responses per respondent	Average burden per response (in hrs.)	Total burden (in hrs.)
Recruiting telephone interview .....	975	1	15/60	244
Survey interview (in person) .....	780	1	30/60	390
Short-term diary completion .....	780	1	15/60	195
Biologic specimen collection .....	780	1	10/60	130
Toenail analysis phone call .....	260	1	5/60	22
Toenail analysis consent form .....	260	1	5/60	22
Total .....				2,320

Dated: March 27, 2003.

#### Agency Forms Undergoing Paperwork Reduction Act Review

The Centers for Disease Control and Prevention (CDC) publishes a list of information collection requests under review by the Office of Management and Budget (OMB) in compliance with the Paperwork Reduction Act (44 U.S.C. Chapter 35). To request a copy of these requests, call the CDC Reports Clearance Officer at (404) 498-1210. Send written comments to CDC, Desk Officer, Human Resources and Housing Branch, New

Executive Office Building, Room 10235, Washington, DC 20503. Written comments should be received within 30 days of this notice.

*Proposed Project:* National Coal Workers' Autopsy Study (NCWAS) Consent Release and History Form 0920-0021—Extension—National Institute for Occupational Safety and Health (NIOSH), Centers for Disease Control and Prevention.

#### Background

Under the Federal Coal Mine Health and Safety Act of 1977, Pub. L. 91-173 (amended the Federal Coal Mine and Safety Act of 1969), the Public Health Service has developed a nationwide autopsy program (NCWAS) for underground coal miners. The NCWAS is a service program to aid surviving relatives in establishing eligibility for black lung compensation. The Consent Release and History Form is primarily used to obtain written authorization from the next-of-kin to perform an autopsy on the deceased miner. Because a basic reason for the post-mortem examination is research (both

epidemiological and clinical), a minimum of essential information is collected regarding the deceased miners, including occupational history and smoking history. The data collected will be used by the staff at NIOSH for research purposes in defining the diagnostic criteria for coal workers' pneumoconiosis (black lung) and pathologic changes that will be correlated with x-ray findings.

It is estimated that only 5 minutes is required for the pathologist to put a statement on the invoice affirming that no other compensation is received for the autopsy. From past experience, it is estimated that 15 minutes is required for the next-of-kin to complete the Consent Release and History Form. Since an autopsy report is routinely completed by a pathologist, the only additional burden is the specific request of abstraction of the terminal illness and final diagnosis relating to pneumoconiosis. Therefore, only 5 minutes of additional burden is estimated for the autopsy report. The annual burden for this data collection is 21 hours, a decrease of 41 hours.

Respondents	Number of respondents	Number of responses/ respondent	Average burden/response (in hrs.)
Pathologist Invoice .....	50	1	5/60
Pathologist Report .....	50	1	5/60
Next-of-Kin .....	50	1	15/60

Dated: March 27, 2003.
