Estimated Reporting and Recordkeeping Non-Hour Cost Burden: We have identified one non-hour cost burden for this collection. In § 280.12, respondents are required to pay \$1,900 to file a notice to conduct research activities related to hard minerals. We have identified no other non-hour cost burdens.

Public Disclosure Statement: The PRA (44 U.S.C. 3501, *et seq.*) provides that an agency may not conduct or sponsor a collection of information unless it displays a currently valid OMB control number. Until OMB approves a collection of information, you are not obligated to respond.

Comments: Before submitting an ICR to OMB, PRA section 3506(c)(2)(A) requires each agency “* * * to provide notice * * * and otherwise consult with members of the public and affected agencies concerning each proposed collection of information * * *”. Agencies must specifically solicit comments to: (a) Evaluate whether the proposed collection of information is necessary for the agency to perform its duties, including whether the information is useful; (b) evaluate the accuracy of the agency’s estimate of the burden of the proposed collection of information; (c) enhance the quality, usefulness, and clarity of the information to be collected; and (d) minimize the burden on the respondents, including the use of automated collection techniques or other forms of information technology.

Agencies must also estimate the “non-hour cost” burdens to respondents or recordkeepers resulting from the collection of information. Therefore, if you have costs to generate, maintain, and disclose this information, you

should comment and provide your total capital and startup cost components or annual operation, maintenance, and purchase of service components. You should describe the methods you use to estimate major cost factors, including system and technology acquisition, expected useful life of capital equipment, discount rate(s), and the period over which you incur costs. Capital and startup costs include, among other items, computers and software you purchase to prepare for collecting information, monitoring, and record storage facilities. You should not include estimates for equipment or services purchased: (i) Before October 1, 1995; (ii) to comply with requirements not associated with the information collection; (iii) for reasons other than to provide information or keep records for the Government; or (iv) as part of customary and usual business or private practices.

We will summarize written responses to this notice and address them in our submission for OMB approval. As a result of your comments, we will make any necessary adjustments to the burden in our submission to OMB.

Public Comment Procedures: Before including your address, phone number, e-mail address, or other personal identifying information in your comment, you should be aware that your entire comment—including your personal identifying information—may be made publicly available at any time. While you can ask us in your comment to withhold your personal identifying information from public review, we cannot guarantee that we will be able to do so.

SUPPLEMENTARY INFORMATION:

Title: 30 CFR Part 218, Collection of Monies Due the Federal Government.
OMB Control Number: 1010-0107.
Bureau Form Number: Form MMS-4425.

Abstract: The Secretary of the U.S. Department of the Interior is responsible for mineral resource development on Federal and Indian lands and the Outer Continental Shelf (OCS). The Secretary, under the Mineral Leasing Act (30 U.S.C. 1923), the Indian Mineral

Development Act of 1982 (Pub. L. 97-382-Dec. 22, 1982), and the Outer Continental Shelf Lands Act (43 U.S.C. 1353), is responsible for managing the production of minerals from Federal and Indian lands and the OCS, collecting royalties and other mineral revenues from lessees who produce minerals, and distributing the funds collected in accordance with applicable laws. The Secretary has a trust responsibility to manage Indian lands and seek advice and information from Indian beneficiaries. The MMS performs the mineral revenue management functions and assists the Secretary in carrying out the Department's trust responsibility for Indian lands. Public laws pertaining to mineral revenues are on our Web site at http://www.mrm.mms.gov/Laws_R_D/PublicLawsAMR.htm.

When a company or an individual enters into a lease to explore, develop, produce, and dispose of minerals from Federal or Indian lands, that company or individual agrees to pay the lessor a share in an amount or value of production from the leased lands. The lessee is required to report various kinds of information to the lessor relative to the disposition of the leased minerals. Such information is generally available within the records of the lessee or others involved in developing, transporting, processing, purchasing, or selling of such minerals. The information collected includes data necessary to ensure that the royalties are accurately valued and appropriately paid.

The burden hour and requirements in § 218.203 have been moved to collection 1010-0120, Solid Minerals and Geothermal Collections (expires December 31, 2010) and are therefore removed from this collection. This change enables program-wide review of all information collections for solid minerals and geothermal resources. This ICR covers unique reporting circumstances including (1) Cross-lease netting in calculation of late-payment interest; (2) designation of designee; and (3) tribal permission for recoupment on Indian oil and gas leases.

Cross-Lease Netting in Calculation of Late-Payment Interest

Regulations at § 218.54 require MMS to assess interest on unpaid or underpaid amounts. The MMS distributes these interest revenues to states, Indian tribes, and the U.S. Treasury, based on financial lease distribution information. Current regulations at § 218.42 provide that an overpayment on a lease or leases may be offset against an underpayment on a different lease or leases to determine the

net payment subject to interest, when certain conditions are met. This is called cross-lease netting. However, RSFA sections 6(a), (b), and (c) require MMS to pay interest on lessees' Federal oil and gas overpayments made on or after February 13, 1997 (6 months after the August 13, 1996, enactment of RSFA). The MMS implemented this RSFA provision in 1997 and began calculating interest on both underpayments and overpayments for Federal oil and gas leases, making the cross-lease netting provisions at § 218.42 no longer applicable for these leases. The MMS estimates that, in about seven cases per year, lessees must comply with the provisions of § 218.42(b) and (c) for Indian tribal leases or Federal leases other than oil and gas, demonstrating that cross-lease netting is correct by submitting production reports, pipeline allocation reports, or other similar documentary evidence. This information is necessary for MMS to determine the correct amount of interest owed by the lessee and to ensure proper value is collected.

Designation of Designee

The RSFA established that lessees (owners, primarily, of operating rights, or secondarily, lease record title) are responsible for making royalty and related payments on Federal oil and gas leases. These RSFA requirements are codified at § 218.52. It is common, however, for a payor rather than a lessee to make these payments. When a payor makes payments on behalf of a lessee, RSFA section 6(g) requires that the lessee designate the payor as its designee and notify MMS of this arrangement in writing. The MMS designed Form MMS-4425, Designation Form for Royalty Payment Responsibility, to request all the information necessary for lessees to comply with these RSFA requirements when they choose to designate an agent to pay for them.

Tribal Permission for Recoupment on Indian Oil and Gas Leases

In order to report cross-lease netting on Indian oil and gas leases, lessees must also comply with regulations at § 218.53(b), allowing only lessees with written permission from the tribe to recoup overpayments on one lease against a different lease for which the tribe is the lessor. The payor must furnish MMS with a copy of the tribe's written permission. Generally, a payor may recoup an overpayment against the current month's royalties or other revenues owed on the same tribal lease. For any month, a payor may not recoup more than 50 percent of the royalties or

other revenues owed in that month, under an individual allotted lease, or more than 100 percent of the royalties or other revenues owed in that month, under a tribal lease. Lessees use Form MMS-2014, Report of Sales and Royalty Remittance (burden hours covered under ICR 1010-0140, expires November 30, 2009), for oil and gas lease recoupments.

The MMS is requesting OMB's approval to continue to collect this information. Not collecting this

information would limit the Secretary's ability to discharge the duties of the office and may also result in loss of royalty payments. Proprietary information submitted is protected, and there are no questions of a sensitive nature included in this information collection. The requirement to respond is mandatory.
