

portion of the Northwest Atlantic Ocean will result, at worst, in a temporary modification in behavior by certain species of marine mammals. This activity is expected to result in no more than a negligible impact on the affected species.

While the number of potential incidental harassment takes will depend on the distribution and abundance of marine mammals in the vicinity of the survey activity, the number of potential harassment takings is estimated to be small. In addition, no take by injury and/or death is anticipated, and the potential for temporary or permanent hearing impairment is low and will be avoided through the incorporation of the mitigation measures mentioned in this document. In addition, the proposed seismic program will not take place in or near subsistence hunting areas.

Proposed Authorization

NMFS proposes to issue an IHA to LDEO for conducting a seismic survey program in the Bermuda Rise portion of the Northwest Atlantic Ocean, provided the proposed mitigation, monitoring, and reporting requirements are incorporated. NMFS has preliminarily determined that the proposed activity would result in the harassment of small numbers of marine mammals; would have no more than a negligible impact on the affected marine mammal stocks; and would not have an unmitigable adverse impact on the availability of stocks for subsistence uses.

Information Solicited

NMFS requests interested persons to submit comments and information concerning this request (see **ADDRESSES**).

SUPPLEMENTARY INFORMATION: The subject permits are requested under the authority of the Marine Mammal Protection Act of 1972, as amended (MMPA; 16 U.S.C. 1361 *et seq.*), the Regulations Governing the Taking and Importing of Marine Mammals (50 CFR parts 18 and 216), the Fur Seal Act of 1966, as amended (16 U.S.C. 1151 *et seq.*), the Endangered Species Act of 1973, as amended (ESA; 16 U.S.C. 1531 *et seq.*), and the regulations governing the taking, importing, and exporting of endangered and threatened species (50 CFR parts 17 and 222-226).

The National Museum of Natural History (File No. 764-1703/PRT-068532) requests a permit to salvage, collect, import/export, analyze samples, carcasses, hard and soft parts taken from pinnipeds, sirenians, sea and marine otters, and cetaceans to obtain information about the biology and life history of marine mammals and the role they play in the environment. Additionally, samples will be archived and curated at the Natural History Museum. No live animal takes are requested. A permit is requested for a period of five years.

Darla Ewalt (File No. 1038-1693/PRT-064776) requests authorization to receive from Canada tissue samples taken from legally harvested beluga whales (*Delphinapterus leucas*),

narwhals (*Monodon monoceros*), walrus (*Odobenus rosmarus*) and ringed seals (*Phoca hispida*). Tissues to be imported include blood, lymph nodes, lungs and reproductive organs. These samples will be utilized in brucellosis research investigating the presence of *Brucella* in subsistence harvested marine mammals. The applicant is requesting a five year permit.

Sea World, Inc. (File No. 116-1691/PRT-062475) requests authorization to collect, receive, import, and export an unlimited number of pinniped and cetacean specimens including but not limited to reproductive cells and organs, urine, feces, saliva, ocular secretions, and whole blood taken from dead or captive individuals to study reproductive physiology, including endocrinology, gamete biology, and cryophysiology. Specimens may be collected under the following circumstances for dead animals: directly taken in fisheries for such animals, in countries or situations where such activity is permitted; killed incidental to fishing or other operations; found dead at sea or beached; or that died of natural causes. For captive animals, specimens may be collected from animals that are being housed in countries or situations where such activity is legal and from animals that have been behaviorally conditioned for specimen donation as part of routine husbandry procedures. Specimens may be taken at anytime of the year and in all areas worldwide where pinnipeds and cetaceans are found. The requested duration of the permit is five years.

In compliance with the National Environmental Policy Act of 1969 (42 U.S.C. 4321 *et seq.*), an initial determination has been made that the activities proposed is categorically excluded from the requirement to prepare an environmental assessment or environmental impact statement.

Concurrent with the publication of this notice in the **Federal Register**, NMFS is forwarding copies of this application to the Marine Mammal Commission and its Committee of Scientific Advisors.
