Please note that written comments received in response to this notice will be considered public records.

Title of Collection: Charter Online Management and Performance System (COMPS) CMO APR.

OMB Control Number: 1810-NEW.

Type of Review: New ICR.

Respondents/Affected Public: State, Local, and Tribal Governments.

Total Estimated Number of Annual Responses: 90.

Total Estimated Number of Annual Burden Hours: 2,970.

Abstract: This request is for a new OMB approval to collect the Annual Performance Report (APR) data from Charter School Programs (CSP) Replication and Expansion of High-Quality Charter Schools (CMO) grantees. The Charter School Programs (CSP) was originally authorized under title V, part B, subpart 1, sections 5201 through 5211 of the Elementary and Secondary Education Act (ESEA) of 1965, as amended by the No Child Left Behind (NCLB) Act of 2001. For fiscal year 2017 and thereafter, ESEA has been amended by the Every Student Succeeds Act (ESSA), (20USC 7221-7221i), which reserves funds to improve education by supporting innovation in public education and to: (2) provide financial assistance for the planning, program design, and initial implementation of charter schools; (3) increase the number of high-quality charter schools available to students across the United States; (4) evaluate the impact of charter schools

on student achievement, families, and communities, and share best practices between charter schools and other public schools; (5) encourage States to provide support to charter schools for facilities financing in an amount more nearly commensurate to the amount States typically provide for traditional public schools; (6) expand opportunities for children with disabilities, English learners, and other traditionally underserved students to attend charter schools and meet the challenging State academic standards; (7) support efforts to strengthen the charter school authorizing process to improve performance management, including transparency, oversight and monitoring (including financial audits), and evaluation of such schools; and (8) support quality, accountability, and transparency in the operational performance of all authorized public chartering agencies, including State educational agencies, local educational agencies, and other authorizing entities.

The U.S. Department of Education (ED) is requesting authorization to collect data from CSP grantees within the CMO program through a new online platform. In 2022, ED began development of a new data collection system, the Charter Online Management and Performance System (COMPS), designed specifically to reduce the burden of reporting for users and increase validity of the overall data. This new collection consists of questions responsive to the actions established in the program's final rule published in the **Federal Register** on July 6, 2022, as well as the CMO program Notice Inviting Applications (NIA). This collection request is a consolidation of all previously established program data collection efforts and provides a more comprehensive representation of grantee performance.

SUPPLEMENTARY INFORMATION:

Purpose: In accordance with the Government in the Sunshine Act (Sunshine Act), Public Law 94–409, as amended (5 U.S.C. 552b), the U.S. Election Assistance Commission (EAC) will conduct an open meeting to review findings from the 2023 EAC Voluntary Electronic Poll Book Pilot Program Report and hear from subject matter experts on different aspects of testing and certification programs of this technology.

Agenda: The U.S. Election Assistance Commission (EAC) will host panels featuring election administrators, EAC staff, and election subject matter experts. They will discuss the findings of the Voluntary Electronic Poll Book Pilot Program Report, the benefits of these programs, lessons learned from the pilot, and information from the voting system test laboratories who participated.

Background: Under the authority of the Help America Vote Act (HAVA), the EAC created the Election Supporting Technology Evaluation Program (ESTEP) to establish requirements and guidelines specific to election technologies that are not covered under the Voluntary Voting System Guidelines (VVSG). The e-poll book pilot is the first in a series of pilots conducted by the ESTEP program, which will also examine voter registration databases, election night reporting systems, and ballot delivery systems.

The e-poll book pilot program testing, took place between January and August 2023. The pilot involved two VSTLs, Pro V&V and SLI Compliance, that tested e-poll book devices from five commercial manufacturers, and two in-house developers. These systems were tested against the Voluntary Electronic Poll Book Requirements (Version 0.9) developed by ESTEP in consultation with the National Institute of Standards and Technology (NIST), cybersecurity and accessibility experts, and other key stakeholders.

The full agenda will be posted in advance on the EAC website: <https://www.eac.gov>.

Status: This meeting will be open to the public.
