k. *Description of Request*: The licensee requests a temporary variance of its minimum reservoir elevation requirement at Florence Lake, pursuant to Article 37(a) of the license which requires an elevation of 7,276.6 feet during the recreation season (July 1 through August 31) and a minimum reservoir elevation of 7,232.6 feet during the remainder of the year. The licensee requests a variance to allow Florence Lake to be drawn down below elevation 7,276.6 feet during the entire 2017 recreation season, to facilitate the installation of a geomembrane liner on the bottom half of the upstream face of Florence Lake Dam. This will enable crews to access the lower portions of the dam, excavate sediment where necessary, and seal the bottom of the membrane liner. The licensee states that a variance from the non-recreation season minimum pool requirement will not be required as the lake will be maintained at or above 7,232.6 feet for the remainder of the year. The licensee has consulted with the resource agencies and the U.S. Army Corps of Engineers regarding this proposal.
