Title: Wireless Enhanced 911 Service, Fourth Memorandum Opinion and Order.

Form No.: N/A.

Type of Review: Extension of a currently approved collection.

Respondents: Business or other for-profit, not-for-profit institutions, state, local or tribal government and individuals or household.

Number of Respondents: 2,500.

Estimated Time per Response: 3 hours.

Needs and Uses: The Fourth Memorandum Opinion and Order (MO&O) responded to petitions for reconsideration of certain aspects of the Third Report and Order (R&O) in this proceeding concerning establishment of a nationwide wireless enhanced 911 emergency communications service. This decision revised, among other things, the deployment schedule that must be followed by wireless carriers that choose to implement E911 service using a handset-based technology. The public burden involves guidelines for filing successful requests for waiver of the E911 Phase II rules. Also, an existing approved burden is slightly changed (but not resubmitted) by extending the deadline for filing reports.

OMB Control Number: 3060-0975.

Title: Promotion of Competitive Networks in Local Telecommunications Markets Multiple Environments (47 C.F.R. Parts 1, 64 & 68).

OMB Control Number: 3060-0979.

Estimated Time per Response: .50 hours.

Frequency of Response: One time reporting requirement.

Total Annual Burden: 155,000 hours.

Total Annual Cost: N/A.

Needs and Uses: The information collected is required for audits of the construction/buildout requirements and/or operational status of various Wireless Radio services in the Commission's licensing database that are subject to rule-based construction/buildout and operational requirements. The Commission's rules for these radio services require construction/buildout within a specified timeframe and require a station to remain operational in order for the license to remain valid.

The Commission is revising this information collection to reflect that automation of the audit process will increase electronic filing from 20% to 80% and reduce the cost to the government.

This regime includes testing and self-certification standards, certification recordkeeping requirements, and consumer information disclosures in appropriate post-sale materials that describe the functionality of these devices and the need to obtain a security module from their cable operator. To the extent manufacturers have complaints regarding the certification process, they may file formal complaints with the Commission. In addition, should manufacturers have complaints regarding administration of the Dynamic Feedback Arrangement Scrambling Technique or DFAST license which

governs the scrambling technology needed to build unidirectional digital cable products, they may also file complaints with the FCC. The 2nd R&O also prohibits MVPDs from encoding content to activate selectable output controls on unidirectional digital cable products, or the down-resolution of unencrypted broadcast television programming. MVPDs are also limited in the levels of copy protection that could be applied to various categories of programming. As a part of these encoding rules is a petition process for new services within existing business models, a PR Newswire Notice relating to initial classification of new business models, and a complaints process for disputes regarding new business models.
