You are invited to comment on the draft AC listed in this notice by submitting written data, views, or arguments, to the address listed above. Your comments should identify "Comments to AC 20-73A." You can examine all comments on the draft AC before and after the closing date, at the Federal Aviation Administration, Room 815, 800 Independence Avenue, SW., Washington, DC 20591, weekdays except Federal Holidays between 8:30 a.m. and 4:30 p.m. The Director of the Aircraft Certification Service considers all communications received on or before the closing date before issuing the final AC.

Background

Since its release on April 21, 1971, AC 20-73 continues to be followed as a means of compliance for inflight icing regulations. The objective of this revision is to provide a uniform and modern means of compliance with regulations for aircraft and engine ice protection requirements. This revision of AC 20-73 is extensive. It addresses common ice protection means of compliance for airplanes, rotorcrafts, and engines, with references to other applicable advisory circulars that address specific types of aircraft, engines, or regulations. An effort has been made in this revision to make the information congruent with compliance means provided in other existing guidance material and policies. Note however that there are instances where current technology is considered sufficient to justify changes, and means of compliance not previously addressed in guidance and policy material are discussed in this proposed document.

You may get a copy of the draft AC from the Internet at: <http://www.airweb.faa.gov/rgl>. You may also request a copy from Mr. George T. Soteropoulos.
