Title: Clean Water Act Section 404 State-Assumed Programs (Renewal).

ICR numbers: EPA ICR No. 0220.11, OMB Control No. 2040-0168.

ICR Status: This ICR is scheduled to expire on February 28, 2010. Under OMB regulations, the Agency may continue to conduct or sponsor the collection of information while this submission is pending at OMB. An Agency may not conduct or sponsor, and a person is not required to respond to, a collection of information, unless it displays a currently valid OMB control number. The OMB control numbers for EPA's regulations in title 40 of the CFR, after appearing in the **Federal Register** when approved, are listed in 40 CFR part 9, are displayed either by publication in the **Federal Register** or by other appropriate means, such as on the related collection instrument or form, if applicable. The display of OMB control numbers in certain EPA regulations is consolidated in 40 CFR part 9.

Abstract: Section 404(g) of the Clean Water Act authorizes States and Tribes to assume the section 404 permit program. States/Tribes must demonstrate that they meet the statutory and regulatory requirements (40 CFR part 233) for an approvable program.

Specified information and documents must be submitted by the State/Tribe to EPA to request assumption. Once the required information and documents are submitted and EPA has a complete assumption request package, the statutory time clock for EPA's decision to either approve or deny the State/Tribe's assumption request starts. The information contained in the assumption request is made available to the other involved Federal agencies (Corps of Engineers, U.S. Fish and Wildlife Service, and National Marine Fisheries Service) and to the general public for review and comment. These minimum information requirements are based on the information that must be submitted when applying for a section 404 permit from the Corps of Engineers (33 CFR part 325).

States/Tribes must be able to issue permits that comply with the 404(b)(1) Guidelines, the environmental review criteria. States/Tribes and the reviewing Federal agencies must be able to review proposed projects to evaluate, avoid, minimize and compensate for anticipated impacts. EPA's assumption regulations establish recommended elements that should be included in the State/Tribes' permit application, so that sufficient information is available to make a thorough analysis of anticipated impacts. These minimum information requirements are based on the information that must be submitted when applying for a section 404 permit from the Corps of Engineers (CWA section 404(h)(1)(A)(i) and section 404(j) and 40 CFR 230.10, 233.20, 233.21, 233.34, and 233.50) (33 CFR 325.1).

EPA is responsible for oversight of assumed programs to ensure that State/Tribal programs are in compliance with applicable requirements and that State/Tribal permit decisions adequately consider, avoid, minimize and compensate for anticipated impacts. States/Tribes must evaluate their programs annually and submit the results in a report to EPA. EPA's assumption regulations establish minimum requirements for the annual report (40 CFR 233.52).

Burden Statement: This collection of information is separated into three pieces. The annual public reporting and record keeping burden for this collection of information is estimated to average 520 hours to request program assumption, 5 hours to complete a permit application and 80 hours to prepare the annual report. Burden means the total time, effort, or financial resources expended by persons to generate, maintain, retain, or disclose or provide information to or for a Federal agency. This includes the time needed

to review instructions; develop, acquire, install, and utilize technology and systems for the purposes of collecting, validating, and verifying information, processing and maintaining information, and disclosing and providing information; adjust the existing ways to comply with any previously applicable instructions and requirements which have subsequently changed; train personnel to be able to respond to a collection of information; search data sources; complete and review the collection of information; and transmit or otherwise disclose the information.

Respondents/Affected Entities: States and Tribes seeking to or having assumed section 404 permit programs.

Estimated Number of Respondents: 6.

Frequency of Response: Once, On Occasion, Annually.

Estimated Total Annual Hour Burden: 101,360.

Estimated Total Annual Cost: There are no annualized capital or O&M costs.

Changes in the Estimates: There is no change in the total estimated burden currently identified in the OMB Inventory of Approved ICR Burdens.

Dated: February 1, 2010.

John Moses,

Acting Director, Collection Strategies Division.

Abstract: The Safe Drinking Water Act (SDWA), as amended in 1996, requires that EPA review existing National Primary Drinking Water Regulations (NPDWRs) no less often than every six years. This cyclical evaluation is referred to as the "Six-Year Review." Through the Six-Year Review process, the EPA reviews existing NPDWRs and evaluates whether potential revisions are appropriate to maintain or improve the health of those persons served by public water systems.

EPA completed and published review results for the first Six-Year Review cycle (1996-2002) on July 18, 2003 (68 FR 42908). The occurrence assessments conducted for the first Six-Year Review were based on compliance monitoring data from 1993 to 1997, which were voluntarily provided by States.

EPA expects to complete and publish the review results for the second Six-Year Review cycle (2003-2009) in the near future. The occurrence assessments conducted for the second Six-Year Review are based on data collected between 1998 and 2005 and voluntarily submitted by States and other primacy agencies under the current Information Collection Request (ICR No. 2231.01, 71 FR 32340, June 5, 2006).

To support future Six-Year Reviews, EPA's Office of Water is renewing the current ICR and requesting that States
