

b. For auxiliary power unit installations, the power unit mounts and adjacent supporting airframe structure must be designed to withstand 1g level flight loads acting simultaneously with the maximum limit torque loads imposed by each of the following:

(1) Sudden auxiliary power unit deceleration due to malfunction or structural failure.

(2) The maximum acceleration of the auxiliary power unit.

c. For engine supporting structure, an ultimate loading condition must be considered that combines 1g flight loads with the transient dynamic loads resulting from each of the following:

(1) The loss of any fan, compressor, or turbine blade.

(2) Where applicable to a specific engine design, and separately from the conditions specified in paragraph c(1) above, any other engine structural failure that results in higher loads.

d. The ultimate loads developed from the conditions specified in paragraphs c(1) and c(2) above are to be multiplied by a factor of 1.0 when applied to engine mounts and pylons and multiplied by a factor of 1.25 when applied to adjacent supporting airframe structure.

#### Atlantic Highly Migratory Species (HMS); NOAA Information Collection Requirements; Technical Amendment

**AGENCY:** National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

**ACTION:** ACTION: Final rule; technical amendment.

**SUMMARY:** This final rule, technical amendment, corrects the cross-references in several parts to regulations

that have since been removed, and it updates the Office of Management and Budget (OMB) table to add new OMB approvals and to correct control number references to the appropriate Code of Federal Regulations (CFR) part or section. The intent is to correct and clarify existing regulations and to comply with the requirement of the Paperwork Reduction Act (PRA) that agencies display current OMB control numbers for each agency information collection requirement and to make this information available to the public.

**DATES:** Effective October 18, 2002.

**ADDRESSES:** Any comments regarding burden-hour estimates for collection-of-information requirements contained in this final rule should be sent to Christopher Rogers, Chief, Highly Migratory Species Management Division, Office of Sustainable Fisheries (F/SF1), NMFS, 1315 East-West Highway, Silver Spring, MD 20910-3282, and to the Office of Information and Regulatory Affairs, Office of Management and Budget, Washington, DC 20503 (ATTN: NOAA Desk Officer).

**FOR FURTHER INFORMATION CONTACT:** Christopher Rogers, 301-713-2347.

#### SUPPLEMENTARY INFORMATION:

##### Cross References

On May 28, 1999, NMFS published a final rule (64 FR 29090) that implemented the Fishery Management Plan for Atlantic Tunas, Swordfish, and Sharks (HMS FMP) and an Amendment to the Atlantic Billfish FMP, which consolidated regulations for Atlantic HMS into one part of the Code of Federal Regulations (CFR). The final consolidated rule inadvertently left in some cross-references to parts that were removed as part of the consolidation. This final rule, technical amendment, corrects references to removed regulations at 50 CFR part 285 and now references the consolidated regulations at 50 CFR part 635 for the sections on reporting requirements at 50 CFR 300.17, definitions at 50 CFR 600.10, and observer requirements at 50 CFR 600.746.

##### OMB Control Numbers

NOAA codifies its OMB control numbers for information collection at 15 CFR part 902. Part 902 of title 15 CFR displays control numbers that OMB assigned to NMFS information pursuant to the PRA, for the public's information.

This final rule, technical amendment, brings part 902 up to date and corrects omissions and errors by revising the table in section 1, paragraph (b) under 50 CFR to reflect the most current OMB control numbers associated with NMFS

information collections contained in regulations appearing in title 50. All of the information collections displayed in section 1(b) have previously been submitted to OMB for approval during implementation of regulations appearing in the individual parts of title 50; this final rule, technical amendment, does not involve any new reporting or recordkeeping requirements.

##### Classification

Notwithstanding any other provision of the law, no person is required to respond to, nor shall any person be subject to a penalty for failure to comply with, a collection of information subject to the requirements of the PRA, unless that collection of information displays a currently valid OMB control number.

The Assistant Administrator for Fisheries finds, pursuant to 5 U.S.C. 553 (b)(B), that, because this final rule makes only minor, non-substantive changes and does not change operating practices in the fishery, it is unnecessary under 5 U.S.C. 553(b)(B) to provide for prior public comment. Because this final rule, technical amendment, does not constitute a substantive rule, good cause exists to waive the 30-day delay in effective date under 5 U.S.C. 553(d). Under this final rule, the HMS fisheries will continue to operate as they have under existing regulations with no changes or disruptions to fishing practices. This final rule makes no substantive changes to existing regulations, but rather removes potential confusion by eliminating outdated cross-references to regulations that NMFS previously removed. In addition, this final rule updates OMB control numbers associated with NMFS information collections, all of which OMB has previously approved.

This final rule has been determined to be not significant for the purposes of Executive Order 12866.
