Summary of Monitoring, Reporting, and Other Requirements Under the 2009 LOA

In the 2011 LOA and regulations, the Navy is required to submit annual Range Complex monitoring and exercise reports by March 1, covering through January 1 of the same year. However, NMFS realized that the LOA for the GOMEX Range Complex training activities expires on March 17. To allow adequate time to review these reports for the issuance of future LOA renewal and rulemakings, the due date of these reports is changed to November 1, covering the period through August 1 of the previous year.

Annual Range Complex Exercise Report

The Navy submitted their 2011 annual Range Complex training activities reports covering the period from the dates when Range Complex LOAs became effective through January 2012, and the reports are posted on NMFS Web site: <http://www.nmfs.noaa.gov/pr/permits/incidental.htm#applications>. In the case of GOMEX Range Complex, the Navy reported that there were no training events during the reporting period between March 2011 and January 2012.

Monitoring and Annual Monitoring Reports

The Navy submitted the Range Complex marine species monitoring reports within the required timeframes and they are posted on NMFS Web site: <http://www.nmfs.noaa.gov/pr/permits/incidental.htm#applications>. Since there were no training events conducted between March 2011 and January 2012 at the GOMEX Range Complex, no monitoring opportunities were available during that period.

Adaptive Management

In general, adaptive management allows NMFS to consider new information from different sources to determine (with input from the Navy regarding practicability) if monitoring efforts should be modified if new information suggests that such modifications are appropriate. All of the 5-year rules and LOAs issued to the Navy include an adaptive management component, which includes an annual meeting between NMFS and the Navy. NMFS and the Navy conducted an adaptive management meeting in October, 2011, which representatives from the Marine Mammal Commission participated in, wherein we reviewed the Navy monitoring results through

August 1, 2011, discussed other Navy research and development efforts, and discussed other new information that could potentially inform decisions regarding Navy mitigation and monitoring. No changes were proposed for the 2012 monitoring plan for the Navy's GOMEX Range Complex training activities.

2011 Monitoring Meeting

The regulations that established the framework for authorizing the taking of marine mammals incidental to Navy RDT&E activities required the Navy, with guidance and support from NMFS, to convene a Monitoring Workshop in 2011 (50 CFR 218.184(i)). The Marine Mammal Monitoring Workshop, which included scientists, representatives from non-governmental organization, and Marine Mammal Commission staff, took place in June 2011. Pursuant to the regulations, this workshop presented a consolidated overview of monitoring activities conducted in 2010, as well as the outcomes of selected monitoring-related research. In 2010, the Navy convened a Scientific Advisory Group (SAG), comprised of experts in the fields of marine mammals and underwater acoustics, to review the Navy's current monitoring plans and make recommendations. The results of the SAG's review were also presented at the meeting. Participants engaged in open discussion of the lessons learned, and discussed how to improve the Navy's monitoring plan moving forward. If changes to monitoring approaches are identified during future workshops that can be implemented during the annual LOA renewal process and subsequent 5-year regulations, the Navy and NMFS will modify the Navy-wide monitoring plan and propose appropriate changes to the monitoring measures in specific LOAs for the different Range Complexes and study areas. For Range Complexes or study areas with substantive monitoring modifications, NMFS will subsequently publish proposed LOAs, with the modifications, in the **Federal Register** and solicit public input. After addressing public comments and making changes as appropriate, NMFS will issue new training area LOAs that reflect the new Navy-wide monitoring plan.

Authorization

Since there are no changes in the Navy's proposed training activities at the GOMEX Range Complex, NMFS' determination that the Navy's GOMEX Range Complex training activities will have no more than a negligible impact on the affected species or stocks of

marine mammals in the action area, as described in the original regulations, is still valid. There is no subsistence use of marine mammals that could potentially be impacted by the Navy's training activities at GOMEX Range Complex. Further, the level of taking authorized in 2012 through March 2014 for the Navy's GOMEX Range Complex training activities is consistent with our previous findings made for the total taking allowed under the GOMEX Range Complex regulations. Accordingly, NMFS has issued a two-year LOA for Navy's training activities conducted at the GOMEX Range Complex from March 18, 2012, through March 17, 2014.

Dated: March 4, 2012.

Deputy Director, Office of Protected Resources, National Marine Fisheries Service.
