SUPPLEMENTARY INFORMATION: Section 274b. of the Atomic Energy Act (AEA) of 1954, as amended, provides the authority for NRC to enter into agreements with States that allow the States to assume, and the NRC to discontinue, regulatory authority over specified AEA radioactive materials and activities. On October 15, 1962, New York entered a section 274b. Agreement with the Atomic Energy Commission (the predecessor regulatory agency to the NRC) to regulate source material, byproduct material, and special nuclear material in quantities not sufficient to form a critical mass. This Agreement also provides the State regulatory authority to evaluate and approve SS&D applications.

On May 9, 2023, the NRC received a letter from New York Governor Kathy Hochul (ADAMS Accession No. ML23131A254) requesting discontinuation of the State's regulatory authority to evaluate and approve SS&D applications and for reassumption of this authority by the NRC. The Commission approved the request and has notified the State of New York that effective August 9, 2023, the NRC has reassumed authority to evaluate and approve SS&D applications within the State (ADAMS Accession No. ML23138A033). The State of New York will retain authority to regulate the manufacture and use of SS&Ds within the State in accordance with its section 274b. Agreement with the NRC.

Dated: August 3, 2023.

For the Nuclear Regulatory Commission.

Brooke P. Clark,

Secretary of the Commission.
