Abstract: The State Review Framework is an oversight tool designed to assess state performance in enforcement and compliance assurance. The Framework's goal is to evaluate state performance by examining existing data to provide a consistent level of oversight and develop a uniform mechanism by which EPA Regions, working collaboratively with their states, can ensure state environmental agencies consistently implement the national compliance and enforcement program to meet agreed-upon goals. Furthermore, the Framework is designed to foster dialogue on enforcement and compliance performance between states to enhance relationships and increase feedback, which will in turn lead to consistent program management and improved environmental results. This request will allow OECA to review and collect information from state and local agency enforcement and compliance files, to support the State Review Framework implementation from FY 2024 to FY 2027. It will also allow EPA to make inquiries to assess the State Review Framework process, including consistency achieved among the EPA

Regions and states, resources required to conduct reviews, and overall effectiveness of the program.

Form Numbers: None.

Respondents/affected entities: States and localities and territories.

Respondent's obligation to respond: mandatory (as part of program authorization under the Clean Water, Clean Air, Safe Drinking Water and Resource Conservation and Recovery Acts).

Estimated number of respondents: 213 (total).

Frequency of response: Once every 5 years.

Total estimated burden: 12,993 hours (per year). Burden is defined at 5 CFR 1320.03(b).

Total estimated cost: \$937,030 (per year), includes \$0 annualized capital or operation & maintenance costs.

Changes in the Estimates: There is an increase of 87 hours in the total estimated per-response burden compared with the ICR currently approved by OMB. This increase is due to the addition of the safe drinking water act enforcement review pilot, which was not captured in the previous ICR. This pilot is not formally part of the SRF, but the Agency believes this ICR is an appropriate forum to collect input, due to their similarities in workload and purpose. At the conclusion of the pilot, the agency will review the program and if necessary, revise this ICR. In addition, there is an increase in the number of respondents from 54 to 213 due to inclusion of all media (CAA, CWA, RCRA and SDWA) for 50 states and 4 territories. Previous ICR's for this collection included a single response for each state/territory, whereas this ICR utilized a different methodology to capture the burden more accurately.
