[Docket No. RP03-208-000]

Wyoming Interstate Company, Ltd.; Notice of Proposed Changes in FERC Gas Tariff

December 24, 2002.

Take notice that on December 17, 2002, Wyoming Interstate Company, Ltd. (WIC) tendered for filing as part of its FERC Gas Tariff, Second Revised Volume No. 2, the following tariff sheets, to be effective February 1, 2003:

Third Revised Sheet No. 42
Second Revised Sheet No. 44

WIC states that the tariff sheets remove provisions requiring shippers to submit a request fee with their initial request for firm transportation service.

Any person desiring to be heard or to protest said filing should file a motion to intervene or a protest with the Federal Energy Regulatory Commission, 888 First Street, NE., Washington, DC 20426, in accordance with sections 385.214 or 385.211 of the Commission's rules and regulations. All such motions or protests must be filed in accordance with section 154.210 of the Commission's regulations. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceedings. Any person wishing to become a party must file a motion to intervene. This filing is available for review at the Commission in the Public Reference Room or may be viewed on the Commission's Web site at <http://www.ferc.gov> using the "FERRIS" link. Enter the docket number excluding the last three digits in the docket number field to access the document. For assistance, please contact FERC Online Support at FERCOnlineSupport@ferc.gov or toll-free at (866) 208-3676, or TTY, contact (202) 502-8659. Comments, protests and interventions may be filed electronically via the Internet in lieu of paper. The Commission strongly encourages electronic filings. See 18 CFR 385.2001(a)(1)(iii) and the instructions on the Commission's Web site under the "e-Filing" link.

Intervention Date: December 30, 2002.

BILLING CODE 6717-01-P

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Docket No. CP03-018-000]

City of Duluth, Minnesota; Notice of Intent to Prepare an Environmental Assessment for the Proposed City of Duluth Pipeline Project and Request for Comments on Environmental Issues

December 24, 2002.

The staff of the Federal Energy Regulatory Commission (FERC or Commission) will prepare an environmental assessment (EA) that will discuss the environmental impacts of the City of Duluth Pipeline Project involving construction and operation of facilities by the City of Duluth, Minnesota (City) in St. Louis County, Minnesota and Douglas County, Wisconsin.¹ These facilities would consist of about 5.3 miles of 10-inch-diameter pipeline, check and block valves, a town border station, and other ancillary facilities. This EA will be used by the Commission in its decision-making process to determine whether the project is in the public convenience and necessity.

If you are a landowner receiving this notice, you may be contacted by a City representative about the acquisition of an easement to construct, operate, and maintain the proposed facilities. The City would seek to negotiate a mutually acceptable agreement. However, if the project is approved by the Commission, that approval conveys with it the right

of eminent domain. Therefore, if easement negotiations fail to produce an agreement, the City could initiate condemnation proceedings in accordance with state law.

A fact sheet prepared by the FERC entitled "An Interstate Natural Gas Facility On My Land? What Do I Need To Know?" was attached to the project notice the City provided to landowners. This fact sheet addresses a number of typically asked questions, including the use of eminent domain and how to participate in the Commission's proceedings. It is available for viewing on the FERC Internet Web site www.ferc.gov.

Summary of the Proposed Project

The purpose of the project is to expand the capacity and service, while improving the reliability, of the City's natural gas distribution system. The gas would enter the City's current system for distribution to residents and businesses of the City. This project would help ensure continued dependable natural gas service to the customers of the City. The volume of gas delivered by the proposed facilities would be 6,000,000 cubic feet per day. The City seeks authority to construct and operate:

- approximately 5.3 miles of 10-inch-diameter pipeline;
- a town border station, including a heater, pressure regulators, relief valves, odorant tank, odorant injector, communication and electronics equipment, valves, and associated piping;
- a pig launcher/receiver trap and associated valving/piping or piping for a temporary pig launcher/receiver trap, a check valve and a block valve; and
- a meter station.

The general location of the project facilities is shown in appendix 1.² If you are interested in obtaining detailed maps of a specific portion of the project, send in your request using the form in appendix 4.

Land Requirements for Construction

Construction of the proposed project would disturb about 44.3 acres of land. Following construction, about 19.4 acres would be maintained as permanent

² The appendices referenced in this notice are not being printed in the **Federal Register**. Copies are available on the Commission's Web site at the "FERRIS" link or from the Commission's Public Reference and Files Maintenance Branch, 888 First Street, NE., Washington, DC 20426, or call (202) 502-8371. For instructions on connecting to FERRIS refer to the last page of this notice. Copies of the appendices were sent to all those receiving this notice in the mail.

right-of-way or aboveground facilities. The remaining 24.9 acres of land would be restored and allowed to revert to its former use.

The EA Process

The National Environmental Policy Act (NEPA) requires the Commission to take into account the environmental impacts that could result from an action whenever it considers the issuance of a Certificate of Public Convenience and Necessity. NEPA also requires us³ to discover and address concerns the public may have about proposals. This process is referred to as "scoping". The main goal of the scoping process is to focus the analysis in the EA on the important environmental issues. By this Notice of Intent, the Commission requests public comments on the scope of the issues it will address in the EA. All comments received are considered during the preparation of the EA. State and local government representatives are encouraged to notify their constituents of this proposed action and encourage them to comment on their areas of concern.

The EA will discuss impacts that could occur as a result of the construction and operation of the proposed project under these general headings:

- geology and soils
- land use
- water resources, fisheries, and wetlands
- cultural resources
- vegetation and wildlife
- air quality and noise
- endangered and threatened species
- hazardous waste

We will also evaluate possible alternatives to the proposed project or portions of the project, and make recommendations on how to lessen or avoid impacts on the various resource areas.

Our independent analysis of the issues will be in the EA. Depending on the comments received during the scoping process, the EA may be published and mailed to Federal, state, and local agencies, public interest groups, interested individuals, affected landowners, newspapers, libraries, and the Commission's official service list for this proceeding. A comment period will be allotted for review if the EA is published. We will consider all comments on the EA before we make our recommendations to the Commission.

³ "We", "us", and "our" refer to the environmental staff of the Office of Energy Projects (OEP).

¹ The City's application was filed with the Commission under Section 7 of the Natural Gas Act and part 157 of the Commission's regulations.
