**SUMMARY:** This notice establishes the initial 2013 aggregate production quotas for controlled substances in schedules I and II of the Controlled Substances Act (CSA) and assessment of annual needs for the list I chemicals ephedrine, pseudoephedrine, and phenylpropanolamine.

**DATES:** *Effective Date:* October 1, 2012.

**FOR FURTHER INFORMATION CONTACT:** John W. Partridge, Executive Assistant, Office of Diversion Control, Drug Enforcement Administration, 8701 Morrisette Drive, Springfield, VA 22152, Telephone: (202) 307-4654.

**SUPPLEMENTARY INFORMATION:** Section 306 of the CSA (21 U.S.C. 826) requires the Attorney General to establish aggregate production quotas for each basic class of controlled substance listed in schedules I and II and for the list I chemicals ephedrine, pseudoephedrine, and phenylpropanolamine. This responsibility has been delegated to the Administrator of the DEA by 28 CFR 0.100. The Administrator, in turn, has redelegated this function to the Deputy Administrator pursuant to 28 CFR 0.104.

The 2013 aggregate production quotas and assessment of annual needs represent those quantities of schedule I and II controlled substances and the list I chemicals ephedrine, pseudoephedrine, and phenylpropanolamine to be manufactured in the United States in 2013 to provide for the estimated medical, scientific, research, and industrial needs of the United States, lawful export requirements, and the establishment and maintenance of reserve stocks. These quotas include imports of ephedrine, pseudoephedrine, and phenylpropanolamine but do not include imports of controlled substances for use in industrial processes.

On August 3, 2012, a notice titled, "Proposed Aggregate Production Quotas

for Schedule I and II Controlled Substances and Proposed Assessment of Annual Needs for the List I Chemicals Ephedrine, Pseudoephedrine, and Phenylpropanolamine for 2013," was published in the **Federal Register** (77 FR 46519). That notice proposed the 2013 aggregate production quotas for each basic class of controlled substance listed in schedules I and II and the 2013 assessment of annual needs for the list I chemicals ephedrine, pseudoephedrine, and phenylpropanolamine. All interested persons were invited to comment on or object to the proposed aggregate production quotas and the proposed assessment of annual needs on or before September 4, 2012.

Five comments (four from DEA-registered manufacturers and one from a non-registrant) were received within the published comment period, offering comments on a total of 20 schedule I and II controlled substances and one list I chemical. Commenters stated that the proposed aggregate production quotas for amphetamine (for conversion), amphetamine (for sale), codeine (for conversion), codeine (for sale), gamma hydroxybutyric acid, hydrocodone (for sale), hydromorphone, lisdexamphetamine, meperidine, methamphetamine, methylphenidate, morphine (for conversion), morphine (for sale), noroxymorphone (for conversion), oripavine, oxycodone (for sale), oxymorphone (for conversion), oxymorphone (for sale), remifentanyl, and sufentanyl were insufficient to provide for the estimated medical, scientific, research, and industrial needs of the United States, export requirements, and the establishment and maintenance of reserve stocks. One commenter stated that the proposed assessment of annual needs quota for phenylpropanolamine (for conversion) was insufficient to provide for the estimated medical, scientific, research, and industrial needs of the United States, export requirements, and the establishment and maintenance of reserve stocks.

In determining the 2013 aggregate production quotas and assessment of annual needs, DEA has taken into consideration the above comments along with the factors set forth at 21 CFR 1303.11 and 21 CFR 1315.11, in accordance with 21 U.S.C. 826(a), and other relevant factors, including the consideration of 2012 manufacturing quotas, current 2012 sales and inventories, 2013 export requirements, industrial use, additional applications for quotas, as well as information on research and product development requirements. Based on this

information, DEA has determined that adjustments to the proposed aggregate production quotas and assessment of annual needs for 3,4-methylenedioxy-N-methylcathinone (methylone), 3,4-methylenedioxypropylvalerone (MDPV), 4-methyl-N-methylcathinone (mephedrone), N-benzylpiperazine, amphetamine (for conversion), amphetamine (for sale), hydrocodone (for sale), hydromorphone, lisdexamphetamine, methylphenidate, morphine (for sale), oxycodone (for sale), oxymorphone (for conversion), remifentanyl, sufentanyl, tapentadol, ephedrine (for conversion), ephedrine (for sale), phenylpropanolamine (for sale), and pseudoephedrine (for sale) are warranted. This notice reflects those adjustments.

Regarding codeine (for conversion), codeine (for sale), gamma hydroxybutyric acid, meperidine, methamphetamine, morphine (for conversion), noroxymorphone (for conversion), oripavine, oxymorphone (for sale), and phenylpropanolamine (for conversion), DEA has determined that the proposed initial 2013 aggregate production quotas and assessment of annual needs are sufficient to meet the current 2013 estimated medical, scientific, research, and industrial needs of the United States. This notice finalizes these aggregate production quotas at the same amounts as proposed.

DEA also specifically considered that inventory allowances granted to individual manufacturers may not always result in the availability of sufficient quantities to maintain an adequate reserve stock pursuant to 21 U.S.C. 826(a), as intended. See 21 CFR 1303.24. This would be concerning if a natural disaster or other unforeseen event resulted in substantial disruption to the amount of controlled substances available to provide for legitimate public need. As such, DEA included in all schedule II aggregate production quotas, and certain schedule I aggregate production quotas, an additional 25% of the estimated medical, scientific, and research needs as part of the amount necessary to ensure the establishment and maintenance of reserve stocks. The established aggregate production quotas reflect these included amounts. This action will not affect the ability of manufacturers to maintain inventory allowances as specified by regulation. DEA expects that maintaining this reserve in certain established aggregate production quotas will mitigate adverse public effects if an unforeseen event resulted in substantial disruption to the amount of controlled substances available to provide for legitimate

public need, as determined by DEA. DEA does not anticipate utilizing the reserve in the absence of these circumstances.

In accordance with 21 U.S.C. 826, 21 CFR 1303.11, and 21 CFR 1315.11, the

Deputy Administrator hereby establishes the 2013 aggregate production quotas for the following schedule I and II controlled substances and the 2013 assessment of annual

needs for the list I chemicals ephedrine, pseudoephedrine, and phenylpropanolamine, expressed in grams of anhydrous acid or base, as follows:

## DEPARTMENT OF LABOR

### Employment and Training Administration

[TA-W-81,791]

#### **Fasco, a Division of Regal Beloit Corporation, Including On-Site Leased Workers From Penmac Personnel Services, Eldon, MI; Notice of Affirmative Determination Regarding Application for Reconsideration**

By application dated August 30, 2012, workers requested administrative reconsideration of the negative determination regarding workers' eligibility to apply for Trade Adjustment Assistance (TAA) applicable to workers and former workers of Fasco, a division of Regal Beloit Corporation, Eldon, Missouri (Fasco). The determination was issued on August 7, 2012. The Department's Notice of determination was published in the **Federal Register** on August 23, 2012 (77 FR 51066).

Fasco is a warehouse and distribution center for electric motors. The subject

worker group includes workers engaged in activities related to the supply of warehousing and distribution of electric motors, as well as engineering, customer service and information technology services. The worker group includes on-site leased workers from Penmac Personnel Services.

The initial investigation resulted in a negative determination based on the findings that there were no shifts to/acquisition from a foreign country by Fasco in the supply of services like or directly competitive with those supplied by the subject workers; that there were no increased imports of services like or directly competitive with those supplied by the subject workers; that Fasco is neither a Supplier to nor a Downstream Producer of a firm that employed a worker group eligible to apply for TAA; and that the workers of Fasco have not met the criteria set forth in Section 222(e) of the Trade Act, as amended.

The request for reconsideration states that workers of the Engineering Services Department provide engineering
