Agency Forms Undergoing Paperwork Reduction Act Review

The Centers for Disease Control and Prevention (CDC) publishes a list of information collection requests under review by the Office of Management and Budget (OMB) in compliance with the Paperwork Reduction Act (44 U.S.C. Chapter 35). To request a copy of these requests, call the CDC Reports Clearance Officer at (404) 498-1210. Send written comments to CDC, Desk Officer, Human Resources and Housing Branch, New

Executive Office Building, Room 10235, Washington, DC 20503. Written comments should be received within 30 days of this notice.

Proposed Project

National Surveillance of Dialysis-Associated Diseases (0920-0033)—Revision—National Center for Infectious Diseases (NCID), Centers for Disease Control and Prevention (CDC). The Division of Healthcare Quality Promotion (DHQP, formerly CDC Hospital Infections Program), is proposing an extension of a yearly survey of dialysis practices and dialysis-associated diseases at U.S. outpatient hemodialysis centers.

The rehabilitation of individuals in the United States who suffer from chronic renal failure has been identified as an important national priority, the Federal Government made a provision in 1973 to provide financial support for chronic hemodialysis patients. CDC, DHQP and Division of Viral Hepatitis have the responsibility of formulating strategies for the control of hepatitis, bacteremia, and other hemodialysis-associated diseases. In order to devise

such control measures, it is necessary to determine the extent to which the incidence of these dialysis-associated diseases changes over time. This request is to continue surveillance activities among chronic hemodialysis centers nationwide.

In addition, once control measures are recommended it is essential that such measures be monitored to determine their effectiveness. The survey is conducted once a year by a mailing to all chronic hemodialysis centers licensed by the Health Care Financing Administration. The types of dialysis practices surveyed include the use of hepatitis B vaccine in patients and staff members, the types of vascular access and dialyzers used, whether certain dialysis items are disinfected for reuse, and whether the dialysis center has any policy for insuring judicious use of antimicrobial agents. Among dialysis-associated diseases, the survey includes hepatitis B virus infection, antibody to hepatitis C virus, antibody to human immunodeficiency virus, and vancomycin-resistant enterococci. The estimated annualized burden is 3800 hours.

Respondents	Number of respondents	Number of responses/ respondent	Avg. burden/ response (in hours)
Chronic Hemodialysis Centers	3,800	1	1

Dated: October 10, 2002.

Nancy E. Cheal,

Acting Associate Director for Policy, Planning and Evaluation, Centers for Disease Control and Prevention.

[Program Announcement Number 02164]

Laboratory Strengthening for Infectious Disease, Surveillance Control and Response in East Africa; Notice of Award of Funds

A. Purpose

The Centers for Disease Control and Prevention (CDC) announces the availability of fiscal year (FY) 2002 funds for a cooperative agreement for Laboratory Strengthening for Infectious Disease Surveillance Control and Response in East Africa.

The purpose of the program is to strengthen the delivery of field support and programming to the CDC and the United States Agency for International Development (USAID) Missions in East Africa. This will be accomplished through the development of new approaches and technologies in response to near and long-term field needs. These needs were established in accordance with the Infectious Disease Interagency Agreement (IAA) between USAID and CDC. This cooperative agreement will support activities in laboratory confirmation of suspected outbreaks, control and prevention of infectious diseases, and system strengthening activities represented by quality assurance and quality control of laboratory confirmation of priority diseases. Measurable outcomes of the

program will be in alignment with one or more of the following performance goals for the Epidemiology Program Office:

1. Encourage state health departments and ministries of health to develop efficient and comprehensive public health information and surveillance systems by promoting the use of the internet and by focusing on development of standards for communications and data elements.
2. Efficiently respond to the needs of our public health partners through the provision of epidemiologic assistance.
3. Implement accessible training programs to provide an effective work force for staffing state and local health departments, laboratories, and ministries of health in developing countries.

B. Eligible Applicants

Assistance will be provided only to the African Medical and Research Foundation (AMREF) in Kenya. No other applications are solicited.

AMREF has extensive and documented experience in providing laboratory reference services, laboratory quality assurance, and training programs for laboratory confirmation, disease control and prevention in East Africa. This includes participation in the External Quality Assessment Scheme in Microbiology conducted by the World Health Organization (WHO) Collaborating Center for Antimicrobiology Resistance at CDC. They have the distinction of being the only organization in East Africa with the knowledge and experience of the logistics and technical issues related to transporting laboratory specimens from rural areas in East Africa. AMREF has extensive experience working in East African countries with ministries of health (MOH) and local non-governmental organizations (NGO), as well as with various international health organizations.

Note: Title 2 of the United States Code section 1611 states that an organization described in section 501(c)(4) of the Internal Revenue Code that engages in lobbying activities is not eligible to receive Federal funds constituting an award, grant or loan.

C. Availability of Funds

Approximately \$80,000 is available in FY 2002 to fund this award. It is expected that the award will begin on or about September 1, 2002 and will be made for a 12-month budget period within a project period of up to 4 years depending on the availability of funds. Funding estimates may change. Continuation awards within an approved project period will be made

on the basis of satisfactory progress as evidenced by required reports and the availability of funds.

1. Direct Assistance

No direct assistance will be provided.

2. Use of Funds

All requests for funds contained in the budget, shall be stated in U.S. dollars. Once an award is made, CDC will not compensate foreign grantees for currency exchange fluctuations through issuance of supplemental awards. By making this statement all requests, not only the initial budget but any subsequent request such as re-directions, requests for supplemental funds, carry-overs, etc. are included. This is Health and Human Services (HHS) policy.

a. Funds may be spent for reasonable program purposes, including personnel, travel, supplies, and services. Equipment may be purchased if deemed necessary to accomplish program objectives, however, prior approval by CDC officials must be requested in writing. All purchased equipment is for the sole use of the project, and will become the property of USAID at the completion of the project.

b. The costs that are generally allowable in grants to domestic organizations are allowable to foreign institutions and international organizations, with the following exception: Indirect costs will not be paid (either directly or through sub-award) to organizations located outside the territorial limits of the United States or to international organizations regardless of their location.

c. The applicant may contract with other organizations under this program; however, the applicant must perform a substantial portion of the activities (including program management and operations, and delivery of prevention services) for which funds are required.

d. Limitations and/or prohibitions on the use of funds are as follows: Alterations and renovations are not allowable.

D. Where To Obtain Additional Information

This and other CDC announcements can be found on the CDC home page Internet address—<http://www.cdc.gov>. Click on "Funding" then "Grants and Cooperative Agreements."

To obtain business management technical assistance, contact: Angelia D. Hill, Grants Management Specialist, International & Territories Acquisition & Assistance Branch, Procurement and Grants Office, Centers for Disease Control and Prevention, 2920

Brandywine Road, Room 3000, E-09, Atlanta, GA 30341-4146. Telephone number (770) 488-2785. email address: ahill@cdc.gov.

For program technical assistance, contact: Dr. Peter Nsubuga, Medical Epidemiologist, Division of International Health, Epidemiology Program Office, Centers for Disease Control and Prevention, 4770 Buford Highway, K-72, Atlanta, GA 30341. Telephone number (770) 488-8334. email address: pcn0@cdc.gov. Or

Kathleen F. Cavallaro, MT (ASCP), MS, Public Health Advisor, Division of Bacterial and Mycotic Diseases, National Center for Infectious Diseases, Centers for Disease Control and Prevention, 4770 Buford Highway, K-72, Atlanta, GA 30341. Telephone number (770) 488-8333. email address: kfc1@cdc.gov.

Dated: October 9, 2002.

Edward J. Schultz,

Deputy Director, Procurement and Grants Office, Centers for Disease Control and Prevention.

[Program Announcement 02093]

Division of International Health/Global Surveillance Project Strengthening Outbreak Investigations and Response in Ghana; Notice of Award of Funds

A. Purpose

The Centers for Disease Control and Prevention (CDC) announces the award of fiscal year (FY) 2002 funds for a cooperative agreement program for the Division of International Health/Global Surveillance Project Strengthening Outbreak Investigations and Response in Ghana. This program addresses the "Healthy People 2010" focus area of Public Health Infrastructure.

The purpose of the program is to strengthen the ability of the Ministry(s) of Health (MOH) to identify, investigate, analyze, respond to and report on disease outbreaks and other unusual health events. By doing so, the agreement will result in strengthening the applied public health programs at the University.

B. Eligible Applicants

Assistance will be provided only to the University of Ghana. No other applications are solicited.
