## II. Background

Under the provisions of the Paperwork Reduction Act of 1995 (44 U.S.C. Chapter 35), the NRC recently submitted a request for renewal of an existing collection of information to

OMB for review entitled, "Solicitation of Non-Power Reactor Operator Licensing Examination Data." The NRC hereby informs potential respondents that an agency may not conduct or sponsor, and that a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number.

The NRC published a **Federal Register** notice with a 60-day comment period on this information collection on September 11, 2020, 85 FR 56278.

1. *The title of the information collection:* Solicitation of Non-Power Reactor Operator Licensing Examination Data.

2. *OMB approval number:* 3150-0235.

3. *Type of submission:* Extension.

4. *The form number if applicable:* N/A.

5. *How often the collection is required or requested:* Annually.

6. *Who will be required or asked to respond:* All holders of operating licenses for non-power reactors under the provision of part 50 of title 10 of the Code of Federal Regulations, "Domestic Licensing of Production and Utilization Facilities," except those that have permanently ceased operations and have certified that fuel has been permanently removed from the reactor vessel.

7. *The estimated number of annual responses:* 31.

8. *The estimated number of annual respondents:* 31.

9. *An estimate of the total number of hours needed annually to comply with the information collection requirement or request:* 31.

10. *Abstract:* The NRC annually request all non-power reactor licensees and applicants for an operating license to voluntarily send to the NRC: (1) Their projected number of candidates for initial operator licensing examinations and (2) the estimated dates of the examinations. This information is used to plan budgets and resources in regard to operator examination scheduling in order to meet the needs of the non-power nuclear community.

**SUPPLEMENTARY INFORMATION:**

The United States engages in significant nuclear cooperation with other nations, including the authorized distribution of source material, pursuant to the terms of an Agreement for Cooperation in Peaceful Uses of Nuclear Energy (123 Agreement). TLI currently holds a specific license, XSOU8839/01, authorizing the export of source material to several countries including the U.K. TLI's export license was issued under the legal framework of a 123 Agreement between the U.S. and EURATOM.

On December 31, 2020, the U.K. will exit from EURATOM, and on January 1, 2021, a 123 Agreement between the U.S. and the U.K. will enter into force. The U.S. Government has already made arrangements with the Government of the U.K. for this transition to occur on January 1, 2021 for all NRC-licensed exports to the U.K. However, beginning on January 1, 2021, the NRC is currently unable to authorize the export of EURATOM-obligated and Canadian-obligated material from the U.S. to the U.K., until pre-approval to retransfer such material to the U.K. is received from EURATOM or the Canadian government, respectively.

This suspension is required as an operation of law and only applies to exports of EURATOM-obligated or Canadian-obligated source material to the U.K. The NRC is reproducing the text of the Order as an attachment to this **Federal Register** notice.

**Attachment—Order Suspending Export Licenses****ORDER MODIFYING LICENSE TO SUSPEND CERTAIN EXPORTS TO THE UNITED KINGDOM**

*(EFFECTIVE January 1, 2021)*

**I**

Transport Logistics International (“TLI” or “the licensee”) holds a specific license (XSOU8839/01) issued by the U.S. Nuclear Regulatory Commission (NRC) pursuant to Sections 62 and 127 of the Atomic Energy Act of 1954, as amended (AEA) and 10 CFR part 110. This specific license authorizes the export of source material to Germany, the Netherlands, and the

United Kingdom (U.K.), under the terms of an Agreement for Cooperation in Peaceful Uses of Nuclear Energy (123 Agreement) between the United States (U.S.) and the European Atomic Energy Community (EURATOM).

**II**

On December 31, 2020, the formal transition period marking the U.K.'s exit from the European Union (EU) will end. On this date, the U.K. will also exit from EURATOM. On January 1, 2021, the U.S./U.K. 123 Agreement will enter into force. At that time, TLI's export license XSOU8839/01 will authorize exports to Germany and the Netherlands under the legal framework of the U.S./EURATOM 123 agreement and will authorize exports to the U.K. under the legal framework of the U.S./U.K. 123 Agreement. After the U.K. exits EURATOM, the NRC is prohibited from authorizing any exports of EURATOM-obligated material from the U.S. to the U.K. until EURATOM, pursuant to the U.S./EURATOM 123 agreement, provides its pre-approval to retransfer EURATOM-obligated material from the U.S. to the U.K. The NRC is likewise prohibited from authorizing any exports of Canadian-obligated material from the U.S. to the U.K. until the Government of Canada, pursuant to the U.S./Canada 123 Agreement, provides its pre-approval to retransfer Canadian-obligated material to the U.K.

The United States Government has already made arrangements with the Government of the U.K. for the transition from the U.S./EURATOM 123 Agreement to the U.S./U.K. 123 Agreement to automatically occur on January 1, 2021, for all NRC-approved export licenses to the U.K. However, the U.S. Government cannot authorize the export of EURATOM-obligated or Canadian-obligated material from the U.S. to the U.K. without pre-approval for retransfer from EURATOM or the Canadian government, respectively. Therefore, beginning on January 1, 2021, TLI will no longer be authorized to export EURATOM-obligated and Canadian-obligated material to the U.K. under license XSOU8839/01 until such prior approval is received.

**III**

Accordingly, pursuant to Sections 62, 64, 123, 127, 161b, 161i, 183, and 186 of the AEA, and 10 CFR 110.50(a)(1) and (2) and 110.52, *it is hereby ordered, effective January 1, 2021, that license XSOU8839/01 is modified as follows:*

A. The licensee's authorization to export EURATOM-obligated material to the U.K. is suspended, and such exports are prohibited, until the licensee

receives notice from the NRC that the United States Government has obtained EURATOM's pre-approval, pursuant to the U.S./EURATOM 123 Agreement, to retransfer EURATOM-obligated material to the U.K. When the licensee receives such notice from the NRC, this provision of the Order will expire without any further action by the NRC.

B. The licensee's authorization to export Canadian-obligated material to the U.K. is suspended, and such exports are prohibited, until the licensee receives notice from the NRC that the United States Government has obtained Canada's pre-approval, pursuant to the U.S./Canada 123 Agreement, to retransfer Canadian-obligated material to the U.K. When the licensee receives such notice from the NRC, this provision of the Order will expire without any further action by the NRC.

The NRC finds that this action is required by operation of law and the common defense and security. Therefore, in accordance with 10 CFR 110.52(c), the licensee need not be afforded an opportunity to reply and be heard prior to issuance of this Order.

Dated at Rockville, Maryland this 17th day of December 2020.
