Estimate of burden: The Facilities Survey will be sent to approximately 600 academic institutions for both the FY 2023 and FY 2025 data collection cycles. Response to this voluntary survey is typically 97 percent each cycle. The total estimated burden is 22,800 for the FY 2023 and FY 2025 surveys combined. Additional details on the burden calculation can be found in the first **Federal Register** Notice published on March 10, 2023, at 88 FR 15102.

II. Background

Under the provisions of the Paperwork Reduction Act of 1995 (44 U.S.C. Chapter 35), the NRC recently submitted a request for renewal of an existing collection of information to OMB for review entitled, "Suspicious Activity Reporting Using the Protective Web Server." The NRC hereby informs potential respondents that an agency may not conduct or sponsor, and that a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number.

The NRC published a **Federal Register** notice with a 60-day comment period on this information collection on March 22, 2023, 88 FR 17280.

1. **The title of the information collection:** Suspicious Activity Reporting Using the Protective Web Server.

2. **OMB approval number:** 3150-0219.

3. **Type of submission:** Extension.

4. **The form number, if applicable:** Not applicable.

5. **How often the collection is required or requested:** On occasion. Reporting is done on a voluntary basis, as suspicious incidents occur.

6. **Who will be required or asked to respond:** NRC license holders and applicants that are not required by regulation to report suspicious activity can voluntarily provide security reports as a result of various advisories that the NRC issues. NRC licensed entities that may voluntarily send reports include applicants for title 10 of the *Code of Federal Regulations* (10 CFR) part 50 license, holders of construction permit under 10 CFR part 50, applicants for 10

CFR part 52 license, fuel fabrication facilities, uranium conversion/deconversion facilities, and holders of certificates of compliance under 10 CFR part 72.

7. *The estimated number of annual responses:* 78.

8. *The estimated number of annual respondents:* 52.

9. *The estimated number of hours needed annually to comply with the information collection requirement or request:* 58.5.

10. *Abstract:* NRC licensees voluntarily report information on suspicious incidents on an ad-hoc basis, as these incidents occur. This information is shared with authorized nuclear industry officials and Federal, State, and local government agencies using the Protected Web Server. Information provided by licensees is considered OFFICIAL USE ONLY and is not made public.

Dated: July 6, 2023.

II. Discussion

Section 54.29 of title 10 of the *Code of Federal Regulations* (10 CFR) establishes the standards for issuance of a renewed license. For nuclear power plants that have received a renewed license, the regulations in 10 CFR 54.31(d) state that “[a] renewed license may be subsequently renewed in accordance with all applicable requirements.” The GALL-SLR Report and SRP-SLR were originally issued in 2017 to provide guidance for subsequent license renewals. The GALL-SLR Report discusses generic aging management reviews of systems, structures, and components (SSCs) that may be within the scope of subsequent license renewal applications (SLRAs) and identifies aging management programs (AMPs) that are determined to
