Regulatory Flexibility Act Certification

I certify that the following action will not have a significant impact on a substantial number of small entities. The major factors considered for this certification were:

1. If approved, the action will not result in any additional reporting, recordkeeping or other compliance requirements for small entities other than the small organizations that will furnish the services to the Government.

2. If approved, the action will result in authorizing small entities to furnish the services to the Government.

3. There are no known regulatory alternatives which would accomplish the objectives of the Javits-Wagner-O'Day Act (41 U.S.C. 46–48c) in connection with the services proposed for addition to the Procurement List.

Comments on this certification are invited. Commenters should identify the statement(s) underlying the certification on which they are providing additional information.

DEPARTMENT OF DEFENSE

Department of the Army, Corps of Engineers

Intent To Prepare an Environmental Impact Statement for the Port of Gulfport Expansion Project, Harrison County, MS (Department of the Army Permit Number SAM–2009–1768–DMY)

AGENCY: U.S. Army Corps of Engineers, DoD.

ACTION: Notice of intent.

SUMMARY: The U.S. Army Corps of Engineers, Mobile District (USACE) announces its intent to prepare an Environmental Impact Statement (EIS) to assess the potential environmental impacts associated with the construction and operation of a project proposed by the Mississippi State Port Authority (MSPA). As part of the NEPA process, the Mississippi Development Authority (MDA) will be a cooperating agency in the preparation of the EIS. The National Marine Fisheries Service (NMFS) has expressed interest in acting as a cooperating agency in the preparation of the EIS.

The proposed project as described in the application filed on March 17, 2010, proposed filling approximately 700 acres of open-water benthic habitat. Since submittal of the application, the proposed project footprint has been modified by the MSPA to reduce the overall potential fill required for implementation and to not include any impacts to the Gulfport Harbor Federal Navigation Channel or Turning Basin. The currently proposed project involves filling of up to 400 acres of open-water bottom in the Mississippi Sound, the construction of wharfs, bulkheads, terminal facilities, container storage areas, intermodal container transfer facilities, dredging and dredged material disposal and infrastructure, and construction of a breakwater of approximately 4,000 linear feet. The proposed expanded port facility will be elevated 25 feet above sea level to provide protection against future tropical storm surge events.

The EIS will evaluate the potential impacts of the proposed project, connected actions, and alternatives. The
