National Agricultural Statistics Service

Title: Vegetable Surveys.

OMB Control Number: 0535-0037.

Summary of Collection: The primary function of the National Agricultural Statistics (NASS) is to prepare and issue current official state and national estimates of crop and livestock production, prices and disposition. The Vegetable Surveys Program obtains basic agricultural statistics for fresh market and processing vegetables in major producing States. The vegetable program has two types of utilization: Some crops are processing only, some are fresh market only, and others are dual crops (both processing and fresh market). Vegetable processors are surveyed in August for acreage contracted and estimated yield. In late November, processors are asked for final acreage harvested, production, and value. The fresh market vegetable program consists of specialized growers who are surveyed at the conclusion of the growing season for estimates of crop production. Producers of onions, strawberries, and asparagus are surveyed in August to obtain forecasted acreage and production. NASS will collect information using surveys.

Need and Use of the Information: NASS will collect information to estimate acreage intended to plant, acreage planted, acreage harvested, yield/production, price, and utilization for the various crops. The estimates provide vital statistics for growers, processors, and marketers to use in making production and marketing decisions.

Description of Respondents: Farms; Business or other for-profit.

Number of Respondents: 19,000.

Frequency of Responses: Reporting: Annually; Other (seasonally).

Total Burden Hours: 5,838.
