

Background

Permits for enhancement of survival through CCAAs encourage non-Federal property owners to implement conservation measures for species that are, or are likely to become, candidates for Federal listing as endangered or threatened by assuring property owners they will not be subjected to increased property use restrictions if the covered species becomes listed in the future. Application requirements and issuance criteria for permits for enhancement of survival through CCAAs are in the Code of Federal Regulations (CFR) at 50 CFR 17.22(d) and 17.32(d). See also our policy on CCAAs (64 FR 32726; June 17, 1999).

Proposed Candidate Conservation Agreement With Assurances

The CCAA that is the subject of this notice is a programmatic agreement between the Service and the MDIFW to further the conservation of the NEC (*Sylvilagus transitionalis*). Under the CCAA, the MDIFW would establish a program in which individual property owners can enroll. To enroll in the program, a property owner would enter into a cooperative agreement with the MDIFW that contains a site-specific management plan for the enrolled lands, and the MDIFW would then issue the property owner a Certificate of Inclusion. The site-specific management plan will specify conservation measures to address known threats to the NEC; those measures may include, but are not limited to, cutting vegetation to promote establishment of shrubland habitat, maintaining existing shrubland habitat, planting seeds and seedlings, controlling invasive plants species, removing non-native eastern cottontails should they occur in Maine in the future, and translocating NEC to newly created habitats. The plan will also specify measures to minimize the incidental take of NEC that might occur as a result of implementing the conservation measures or conducting other covered activities. The Certificate of Inclusion issued to the property owner will authorize this incidental take of the NEC if the species becomes listed under the ESA in the future.

The MDIFW seeks to enroll up to 12,000 acres (ac) (4,856 hectares (ha)) of private and State-owned land for NEC habitat management in York, Cumberland, Androscoggin, Sagadahoc, Lincoln, Knox, Oxford, Kennebec, and Waldo Counties in Maine. Lands targeted for NEC habitat management are generally those for which the current land use maintains or is capable of maintaining suitable NEC habitat with

minimal take of NECs. Site potential for enrolled lands will be evaluated through a Habitat Suitability Index. Because resources for implementing conservation measures on enrolled lands are limited, sites with the highest potential value will be prioritized for enrollment based on proximity to existing occupied sites, along with other habitat parameters. Also eligible for enrollment are those lands under the same ownership that are adjacent to lands being managed for the benefit of NEC (hereafter referred to as "adjacent lands"). These adjacent lands include areas where otherwise lawful ongoing and future activities (e.g., hay production and timber harvesting) may result in inadvertent take of NEC. Although the amount of adjacent acreage that a property owner will enroll under this CCAA will depend on the circumstances specific to the property and property owner, we estimate that the typical property owner will enroll an area of adjacent lands about equal to five times the area of the lands managed for NEC. Therefore, about 60,000 ac (24,000 ha) of adjacent lands are associated with the 12,000 ac (4,856 ha) targeted for NEC habitat management. If we were to reach our target of 12,000 ac (4,856 ha) managed for NEC under this CCAA, then we estimate a total of about 72,000 ac (29,000 ha) would be enrolled under this CCAA.

As required by NEPA, we evaluated the effects to the environment that would result from issuance of the requested permit, and we do not foresee any significant effects. Therefore, we are proposing to categorically exclude this action from further analysis under NEPA. Entering into a cooperative agreement is strictly voluntary for property owners, and the activities to be covered under the permit are generally activities already occurring on these properties.

Next Steps

We will evaluate the permit application, associated documents, and comments we receive to determine whether the permit application meets the requirements of the ESA, NEPA, and implementing regulations. If we determine that all requirements are met, we will sign the proposed CCAA and issue a permit under section 10(a)(1)(A) of the ESA to the MDIFW for take of NEC. We will not make our final decision until after the end of the 30-day public comment period, and we will fully consider all comments we receive during the public comment period.
