

- Impacts on air, soil, and water resources (including air quality and surface water impacts)

- Visual impacts
- Socio-economic impacts and disproportionately high and adverse impacts to minority and low-income populations

This list is not intended to be all-inclusive or to imply any predetermination of impacts. Western invites interested parties to suggest specific issues within these general categories, or other issues not included above, to be considered in the EIS.

Public Participation

Interested parties are invited to participate in the scoping process to help define the scope of the EIS, significant resources, and issues to be analyzed in depth, and to eliminate from detailed study issues that are not pertinent. The EIS scoping process will involve all interested agencies (Federal, State, county, and local), Native American tribes, public interest groups, businesses, affected landowners, and individual members of the public.

Western will hold one public meeting in O'Neill, Nebraska, and will announce the EIS scoping meeting details through local news media, direct mailings, and by posting on the Western Web site at <http://www.wapa.gov/ugp/Environment/default.htm> at least 15 days prior to the meeting. Attendees will be able to speak directly with Western and Grand Prairie Wind representatives at the EIS scoping meetings about the proposed Project. Attendees are welcome to come and go at their convenience throughout the meeting. If inclement weather should prohibit hosting the scoping meeting, an alternate meeting date and location will be publicized locally. The meeting location is handicapped-accessible. Anyone needing special accommodations should contact Mr. Marsh to make arrangements.

The public is encouraged to provide information and comments on issues it believes Western should address in the EIS. Comments may be broad in nature or restricted to specific areas of concern. After gathering comments on the scope of the EIS, Western will address those issues raised during scoping in the EIS. While comments will be accepted at any time during the EIS process, submission of comments by the end of the scoping comment period will ensure full consideration in the Draft EIS. Comments may be submitted at the public scoping meeting or sent to Western as described under the

ADDRESSES section above. Comments received outside of the designated comment periods may be addressed in

the Draft EIS; otherwise they will be addressed later in the process, such as in the Final EIS, if practicable.

The EIS process will include this NOI, local EIS scoping meeting notifications, a public scoping meeting; consultation and coordination with appropriate Federal, State, county, and local agencies and tribal governments; involvement with affected landowners; distribution of and public review and comment on the Draft EIS; a formal public hearing or hearings on the Draft EIS; distribution of a published Final EIS; and publication of a Record of Decision in the **Federal Register**.

Abstract: Section 7004(b) of the Resource Conservation and Recovery Act (RCRA) gives EPA broad authority to provide for, encourage, and assist public participation in the development, revision, implementation, and enforcement of any regulation, guideline, information, or program under RCRA. In addition, the statute specifies certain public notices (i.e., radio, newspaper, and a letter to relevant agencies) that EPA must provide before issuing any RCRA permit. EPA carries out much of its RCRA public involvement at 40 CFR Parts 124 and 270.

Burden means the total time, effort, or financial resources expended by persons to generate, maintain, retain, or disclose or provide information to or for a Federal agency. This includes the time needed to review instructions; develop, acquire, install, and utilize technology and systems for the purposes of collecting, validating, and verifying information, processing and maintaining information, and disclosing and providing information; adjust the existing ways to comply with any previously applicable instructions and requirements which have subsequently changed; train personnel to be able to respond to a collection of information; search data sources; complete and review the collection of information; and transmit or otherwise disclose the information.

Estimated Total Annual Hour Burden: 3,005 hours.

Estimated Total Annual Cost:

\$195,914, includes \$3,549 annualized capital and O&M costs.
