DEPARTMENT OF THE INTERIOR**National Park Service****Notice of Availability (NOA) for a Draft Environmental Impact Statement**

AGENCY: National Park Service, Interior.

SUMMARY: This notice is being published in accordance with 40 CFR 1506.6. Pursuant to section 102(2)(c) of the National Environmental Policy Act of 1969, the U.S. Department of the Interior, National Park Service (NPS) has prepared a Draft Environmental Impact Statement (DEIS) for the Feasibility Study (Special Resource Study) on the Preservation of Civil War Battlefields and Related Historic Sites along the Vicksburg Campaign Trail (VCT) in Arkansas, Louisiana, Mississippi, and Tennessee. More than 500 sites were examined with a view to how they might best be preserved and linked together into the Vicksburg Campaign Trail Initiative. The study process evaluated the national significance, suitability, feasibility, and management options for each identified site according to NPS standards and criteria established by the Civil War Sites Advisory Commission Report on the Nation's Civil War Battlefields (1993).

Experts and professional historians evaluated each site to determine whether it qualifies as Tier One (Decisive-Major), Tier Two (Formative), or Tier Three (Limited) as well as Associated Sites (non-battlefield) and submerged resources. Decisive battles

(Tier One sites) had a direct, observable impact on the direction, duration, conduct, or outcome of the Civil War. Major battles (also Tier One) had a direct, observable impact on the direction, duration, conduct, or outcome of the Vicksburg Campaign. Formative battles (Tier Two sites) had an observable influence on the direct, duration, or conduct of the Vicksburg Campaign. Tier Three (Limited) sites typically involved detachments of the field armies, in which a commander achieved a limited tactical objective of reconnaissance, defense, or occupation, without observable influence on the direction of the campaign. The study identified 19 Tier One, 26 Tier Two, 131 Tier Three, and numerous associated sites, for a total of over 500 sites included in the Vicksburg Campaign Trail.

Based on this evaluation, some Tier One sites have been recommended for addition to the National Park System. Protection and interpretation of sites not recommended for addition to the National Park System will be sought via other arrangements that may include management by other Federal agencies, State or local governments, non-profit organizations or private owners. These different management options form the basis for three alternatives, the environmental impacts of which are analyzed in the DEIS:

Alternative A: No Action. The Federal Government/NPS would take no action to enhance the preservation of battlefields and other historic sites and resources associated with the Vicksburg Campaign Trail. No new sites among the over 500 identified Tier One, Two, Three, and associated properties would be added to the National Park System and no Federal efforts would be undertaken to link individual sites into a campaign trail initiative.

Alternative B: Limited Preservation—Tier One Actions. The NPS would engage in the protection/preservation of all sites associated with the Vicksburg Campaign Trail that have been recognized as being nationally significant, i.e. the Tier One Sites. Actions would range from direct acquisition by the NPS of some sites (such as Fort Heiman, now in private ownership) to assisting other managing authorities in the protection and preservation of other sites (e.g. Fort Pillow). While the Tier One sites would be acknowledged and linked, no formal VCT Initiative would be established.

Alternative C: Comprehensive Preservation—The Vicksburg Campaign Trail Initiative. This is the preferred alternative and constitutes the recommendation of the Feasibility
