Authorization To Manufacture and Distribute Postage Meters

AGENCY: Postal Service.

ACTION: Proposed rule.

SUMMARY: This proposed rule amends the regulations for inspecting postage meter production facilities that are located outside the continental United States. This proposed rule intends to require the manufacturer to reimburse the Postal Service for costs incurred by required inspections of production facilities located outside the continental United States.

DATES: The Postal Service must receive your comments on or before June 10, 2002.

ADDRESSES: Mail or deliver written comments to the manager, Postage Technology Management, 1735 N Lynn Street, Room 5011, Arlington, Virginia 22209-6050. You can view and copy all written comments at the same address

SUPPLEMENTARY INFORMATION: Title 39, Code of Federal Regulations (CFR) part 501, Authorization to Manufacture and Distribute Postage Meters, requires the Postal Service to inspect meter production facilities to determine if the facilities satisfy Postal Service requirements for meter and component security and production quality. A manufacturer may have valid business reasons for selecting a particular location for its production facilities. However, when a manufacturer chooses to locate these facilities outside the continental United States, conducting the required inspections of such facilities places an undue cost burden on the Postal Service. The Postal Service is requiring the manufacturer to reimburse such costs.

Approval and Promulgation of Air Quality Implementation Plans; State of Montana; Great Falls Carbon Monoxide Redesignation to Attainment and Designation of Areas for Air Quality Planning Purposes

AGENCY: Environmental Protection Agency (EPA).

ACTION: Proposed rule.

SUMMARY: On February 9, 2001, the Governor of Montana submitted a request to redesignate the Great Falls "not classified" carbon monoxide (CO) nonattainment area to attainment for the CO National Ambient Air Quality Standard (NAAQS). The Governor also submitted a CO maintenance plan. In this action, EPA is proposing approval of the Great Falls CO redesignation request and the maintenance plan. In the Final Rules Section of this **Federal Register**, EPA is approving the State's redesignation request and State Implementation Plan (SIP) revision, involving the maintenance plan, as a direct final rule without prior proposal because the Agency views the redesignation and SIP revision as noncontroversial and anticipates no adverse comments. A detailed rationale for the approval is set forth in the direct final rule. If no adverse comments are received in response to this proposed rule, no further activity is contemplated in relation to this rule. If EPA receives adverse comments, the direct final rule will be withdrawn and all public comments received will be addressed in
