SUPPLEMENTARY INFORMATION:

I. Introduction

The NRC is issuing a revision to an existing guide in the NRC's "Regulatory Guide" series. This series was developed to describe and make available to the public information

regarding methods that are acceptable to the NRC staff for implementing specific parts of the agency's regulations, techniques that the staff uses in evaluating specific issues or postulated events, and data that the staff needs in its review of applications for permits and licenses.

Revision 2 of RG 1.215 was issued with a temporary identification as Draft Regulatory Guide, DG-1316. This revision (Revision 2) of RG 1.215 approves for use Nuclear Energy Institute (NEI) 08-01, "Industry Guideline for the ITAAC Closure Process under 10 CFR part 52," Revision 5—Corrected (Ref. 2), subject to certain exceptions and additional guidance described in this regulatory guide under Section C, Staff Regulatory Guidance. The NEI 08-01, Revision 5—Corrected, was updated to include additional guidance related to ITAAC maintenance, lessons learned from simulated ITAAC closure implementation, changes to the information and formatting guidance for uncompleted ITAAC notifications, and other enhancements.

II. Additional Information

Draft Guide 1316 was published in the **Federal Register** on January 5, 2015 (80 FR 265) for a 60-day public comment period. The public comment period closed on March 6, 2015. Public comments on DG-1316 and the staff responses to the public comments are available under ADAMS Accession Number ML15105A446.

III. Congressional Review Act

This regulatory guide is a rule as defined in the Congressional Review Act (5 U.S.C. 801-808). However, the Office of Management and Budget has not found it to be a major rule as defined in the Congressional Review Act.

IV. Backfitting and Issue Finality

This regulatory guide approves updated industry guidance for ITAAC closure, including the different kinds of ITAAC notifications required by 10 CFR 52.99. Issuance of this regulatory guide is not inconsistent with the issue finality provisions in 10 CFR part 52. As discussed in the "Implementation" section of this regulatory guide, the NRC has no current intention to impose this regulatory guide on current holders of combined licenses. In addition, the matters in this regulatory guide are not within the matters subject to issue finality protection under 10 CFR 52.83 or 10 CFR 52.98. Therefore, any imposition of this regulatory guide on current holders of combined licenses, or
