Preliminary Issues

The US Forest Service has identified the following preliminary issues including potential cumulative effects to watershed resources and wildlife habitat.

Permits or Licenses Required

An Air Pollution Permit, Smoke Management Plan, and California Water Quality Board timber harvest waiver for waste discharge are required by local agencies.

Scoping Process

This notice of intent initiates the scoping process, which guides the development of the environmental impact statement. The Sugarloaf Hazardous Fuels Reduction Project will initiate and request comments at: an open house in Oroville, CA in June 2012, an official 45 day comment period once a Notice of Availability (NOA) is published in the **Federal Register**, a 30 day objection period, and an objection resolution period.

It is important that reviewers provide their comments at such times and in such manner that they are useful to the agency's preparation of the environmental impact statement. Therefore, comments should be provided prior to the close of the comment period and should clearly articulate the reviewer's concerns and contentions.

Comments received in response to this solicitation, including names and addresses of those who comment, will be part of the public record for this proposed action. Comments submitted anonymously will be accepted and considered; however, anonymous comments will not provide the Agency with the ability to provide the respondent with subsequent environmental documents. Individual members of organizations must have submitted their own comments to meet the requirements of eligibility as an individual, objections received on behalf of an organization are considered as those of the organization only.

There will not be an appeal period after the final decision. Instead of an appeal period, there will be an objection process before the final decision is made and after the final EIS is mailed (36 CFR part 218). In order to be eligible to file an objection to the preferred alternative identified in the final EIS, specific written comments related to the project must be submitted during scoping or any other periods public comment is

specifically requested on this EIS (36 DFR 218.5).

Comments received in response to this solicitation, including names and addresses of those who comment, will become part of the public record for this proposed action. Comments submitted anonymously will be accepted and considered, however.
