

demonstration that isotopic ratios in tissue samples from a given species are correlated with those of the prey items included in the diet. As stable isotope composition does not change over time, the isotope signature of seals collected by the historic explorers early in the 20th century will reflect the diet of Weddell seals at that time. These data will be compared to the isotopic signature of Weddell seals in the Ross Sea today. Such data may provide evidence of a potential shift in the diet of this apex predator that might be indicative of ecosystem change.

[NRC-2011-0191]

Draft License Renewal Interim Staff Guidance LR-ISG-2011-05: Ongoing Review of Operating Experience

AGENCY: Nuclear Regulatory Commission.

ACTION: Revision of draft interim staff guidance; request for public comment.

SUMMARY: On August 24, 2011, in the *Federal Register* (76 FR 52995), the U.S. Nuclear Regulatory Commission (NRC) requested public comments on Draft License Renewal Interim Staff Guidance (LR-ISG), LR-ISG-2011-05, "Ongoing Review of Operating Experience." This LR-ISG provides guidance and clarification concerning ongoing review of plant-specific and industry-wide operating experience as an attribute of aging management programs used at nuclear power plants. As noticed on September 20, 2011 (76 FR 58311), the public comment period was extended and, as of October 23, 2011, is now closed. However, since issuing the draft LR-ISG for public comment, the NRC has identified the need to incorporate additional guidance. As such, the NRC is re-issuing draft LR-ISG-2011-05 to request public comments on the changes.

DATES: The comment period on the revised draft LR-ISG-2011-05 expires on December 15, 2011. Comments received after this date will be considered, if it is practical to do so, but the NRC is able to ensure consideration only for comments received on or before this date.

ADDRESSES: Please include Docket ID NRC-2011-0191 in the subject line of your comments. Background

The NRC issues LR-ISG to communicate insights and lessons learned and to address emergent issues not covered in license renewal guidance documents, such as NUREG-1801, Revision 2, "Generic Aging Lessons Learned (GALL) Report" (ADAMS Accession No. ML103490041), and NUREG-1800, Revision 2, "Standard Review Plan for Review of License Renewal Applications for Nuclear Power Plants" (SRP-LR) (ADAMS Accession No. ML103490036). In this way, the NRC staff and stakeholders may use the guidance in an LR-ISG document until it is incorporated into a formal license renewal guidance document revision. The NRC staff issues LR-ISG in accordance with the LR-ISG Process, Revision 2 (ADAMS Accession No. ML100920158), for which a notice of availability was published in the **Federal Register** on June 22, 2010 (75 FR 35510).

The NRC staff developed draft LR-ISG-2011-05 to clarify guidance on how the ongoing review of operating experience should be used to ensure the effectiveness of the license renewal aging management programs used at nuclear power plants to meet the requirements of Title 10 of the Code of Federal Regulations (10 CFR) part 54, "Requirements for Renewal of Operating Licenses for Nuclear Power Plants." The draft LR-ISG proposes to revise the NRC staff's recommended aging management programs in the GALL Report and the NRC staff's aging management review procedures and acceptance criteria in the SRP-LR.

On August 24, 2011, the NRC requested public comments on draft LR-ISG-2011-05. By letter dated August 29, 2011 (ADAMS Accession No. ML11242A114), the Nuclear Energy Institute (NEI) requested a 30-day extension to the comment period and a public meeting to discuss draft comments and questions concerning implementation of the LR-ISG. The NRC staff granted the NEI's requests, as noticed on September 20, 2011 (76 FR 58311). The public meeting was held on October 12, 2011, and the comment period was extended until October 23, 2011.

Since first issuing draft LR-ISG-2011-05 for comment, the NRC has identified the need to include additional guidance on areas where license renewal applicants should ensure their programmatic activities for operating experience reviews are appropriate for considering operating experience related to aging management. The NRC identified the need for this additional guidance through its ongoing reviews of license renewal applications and through recent insights gained on how nuclear power plant licensees carry out their operating experience review activities. The additional guidance covers areas where enhancements may need to be made for license renewal, such as the specific kind of information that should be considered as operating experience; the training of plant personnel who screen, assign, evaluate, and submit operating experience information; information to consider in operating experience evaluations; criteria for identifying and categorizing operating experience as related to aging; and guidelines for reporting operating experience on age-related degradation to the industry. The NRC staff outlined these changes at the October 12, 2011, public meeting, and is now requesting public comments on them. The revised draft LR-ISG-2011-05 includes change bars in the margin to help comment providers identify those areas that have

changed. By this action, the NRC is requesting comments on these changes.

The NRC will make a final determination regarding issuance of the LR-ISG after considering comments received in response to this request, in addition to those comments received in response to the original request.

For the Nuclear Regulatory Commission.

Dated at Rockville, Maryland, this 16th day of November, 2011.

Melanie A. Galloway,

*Acting Director, Division of License Renewal,
Office of Nuclear Reactor Regulation.*
