

regarding exposure and susceptibility of children, pregnant women, and other potentially susceptible individuals; and

- Consider possible similar health effects of phthalate alternatives used in children's toys and child care articles.

The CHAP must review prior work on phthalates by the Commission, but it is not to be considered determinative because the CHAP's examination must be conducted *de novo*.

The CHAP must make recommendations to the Commission regarding any phthalates (or combinations of phthalates), in addition to those identified in section 108 of the CPSIA, or phthalate alternatives that the panel determines should be prohibited from use in children's toys or child care articles, or otherwise restricted. The CHAP members were selected by the Commission from scientists nominated by the National Academy of Sciences.

See 15 U.S.C. 2077, 2030(b).

The CHAP met previously in April, July, and December 2010, March, July, and November 2011, and in February 2012, at the CPSC's offices in Bethesda, MD, and by teleconference in November 2010, September 2011, December 2011, and February and April 2012. The CHAP heard testimony from interested parties at the July 2010, and November 2011, meetings. There will not be any opportunity for public comment during the June 2012 teleconference.

Dated: June 5, 2012.

Todd A. Stevenson,
Secretary, Consumer Product Safety
Commission.

SUPPLEMENTARY INFORMATION:

1. *Background.* Population growth within the Denver, Colorado, metropolitan area continues to create a demand on water providers. Colorado's population is projected to be between 8.6 and 10.3 million in 2050. The Statewide Water Supply Initiative (SWSI), commissioned by the State Legislature, estimates that by 2050, Colorado will need between 600,000 and 1 million acre-feet/year of additional municipal and industrial water. There is also a strong need for additional water supplies for the agricultural community in the South Platte Basin as thousands of acres of previously irrigated land has not been farmed in recent years due to widespread irrigation well curtailments. The purpose and need of the Chatfield Reservoir Storage Reallocation study is to increase availability of water, sustainable over the 50-year period of analysis, in the greater Denver area so that a larger proportion of existing and future (increasing) water needs can be met.

By authority provided under Section 808 of the Water Resources Development Act of 1986 (Pub. L. 99-622), as amended by Section 3042 of the Water Resources Development Act of 2007 (Pub. L. 110-114), the Secretary of the Army, upon request of and in coordination with, the Colorado Department of Natural Resources (CDNR), and upon the Chief of Engineers' finding of feasibility and economic justification, may reassign a portion of the storage space in the Chatfield Lake project to joint flood control-conservation purposes, including storage for municipal and industrial water supply, agriculture, environmental restoration, and recreation and fishery habitat protection and enhancement. The reallocation was conditioned upon the appropriate non-Federal interests agreeing to repay the
