Those individuals requesting a public hearing should submit a written request to the Chief, Permits, Conservation and Education Division at the address listed above. The request should set forth the specific reasons why a hearing on this application would be appropriate.

FOR FURTHER INFORMATION CONTACT: Laura Morse or Carrie Hubbard, (301) 713-2289.

SUPPLEMENTARY INFORMATION: The subject permit is requested under the authority of the Marine Mammal Protection Act of 1972, as amended (MMPA; 16 U.S.C. 1361 *et seq.*), and the regulations governing the taking and importing of marine mammals (50 CFR part 216).

The applicant requests a five-year permit to take bottlenose dolphins for scientific research. Annually, up to 15,000 individuals would be approached for photo-identification and behavioral studies and 100 dolphins would be remotely biopsy sampled. Fifty dolphins a year would be captured, examined, sampled, tagged, marked, and released for health assessment studies. Research would occur in the shallow coastal waters of west Florida out to 50 nm offshore, with a focus along the central west coast, from Clearwater southward to Fort Myers, including Sarasota Bay, Tampa Bay, Lemon Bay, Gasparilla Sound, Charlotte Harbor, and Pine Island Sound. Females with calves less than one year old would not be captured. The research would provide crucial background information on individual identification, sex, age, reproductive status, and genetic relationships to support long-term observational studies of population structure, population dynamics, life history, social structure, genetic structure including paternity patterns, and human interactions. The sampling and tagging would support studies of contaminant loads and associated medical effects, immune system function, effects of harmful algae, nutritional status, feeding behavior, ranging patterns, studies of

whistle development and function, measures of hearing ability, and behavior associated with sound production. Research would also include assessments of oil spill impacts at individual and population levels.

In compliance with the National Environmental Policy Act of 1969 (42 U.S.C. 4321 *et seq.*), an initial determination has been made that the activity proposed is categorically excluded from the requirement to prepare an environmental assessment or environmental impact statement.

Concurrent with the publication of this notice in the **Federal Register**, NMFS is forwarding copies of the application to the Marine Mammal Commission and its Committee of Scientific Advisors.

Dated: October 13, 2010.

P. Michael Payne,

Chief, Permits, Conservation and Education Division, Office of Protected Resources, National Marine Fisheries Service.

Freshwater Crawfish Tail Meat From the People's Republic of China: Extension of the Final Results of Antidumping Duty Administrative and New-Shipper Reviews

AGENCY: Import Administration, International Trade Administration, Department of Commerce.

DATES: *Effective Date:* October 19, 2010.

FOR FURTHER INFORMATION CONTACT:

Dmitry Vladimirov, AD/CVD Operations, Office 5, Import Administration, International Trade Administration, U.S. Department of Commerce, 14th Street and Constitution Avenue, NW., Washington, DC 20230; telephone: (202) 482-0665.

SUPPLEMENTARY INFORMATION:

Background

On June 16, 2010, the Department of Commerce (the Department) published

in the **Federal Register** the preliminary results of the administrative and new-shipper reviews of the antidumping duty order on freshwater crawfish tail meat from the People's Republic of China. *See Freshwater Crawfish Tail Meat From the People's Republic of China: Preliminary Results of Antidumping Duty Administrative and New-Shipper Reviews*, 75 FR 34100 (June 16, 2010) (*Preliminary Results*). The reviews cover the period September 1, 2008, through August 31, 2009. The final results of the administrative and new-shipper reviews were originally due no later than October 14, 2010.

Extension of Time Limit for Final Results

Section 751(a)(3)(A) of the Tariff Act of 1930, as amended (the Act), requires the Department to issue the final results of an administrative review within 120 days after the date on which the preliminary results are published. If it is not practicable to complete the review within this time period, section 751(a)(3)(A) of the Act allows the Department to extend the time limit for the final results up to 180 days after the date on which the preliminary results are published.

Section 751(a)(2)(B)(iv) of the Act and 19 CFR 351.214(i)(1) require the Department to issue the final results of a new-shipper review within 90 days after the date on which the preliminary results are issued. The Department may extend the deadline for completion of the final results of a new-shipper review to 150 days after the date on which the preliminary results are issued if it determines that the case is extraordinarily complicated. See 19 CFR 351.214(i)(2).

On March 29, 2010, in accordance with 19 CFR 351.214(j)(3), a new shipper, Nanjing Gensen International Co., Ltd., agreed to waive the applicable time limits for conducting the new-shipper review and consented to the alignment of the new-shipper review with the concurrent administrative review. *See Preliminary Results*, 75 FR at 34101. Accordingly, we may extend the deadline of October 14, 2010, for completion of the final results of the new-shipper review to coincide with completion of the final results of the administrative review.

We find that it is not practicable to complete these reviews by October 14, 2010, because we require additional time to analyze and address a complicated surrogate-value issue involving the most appropriate methodology for valuing labor for the final results of these reviews. Consequently, in accordance with
