File No. 704–1698: The University of Alaska Museum is authorized to take, import and export specimen samples (whole carcasses; hard and soft parts) from all marine mammal species (pinnipeds and cetaceans) under NMFS jurisdiction. The objective of this permit is to archive specimens for future bona fide research at the University of Alaska and other institutions in the U.S. and world-wide.

File No. 1044–1706: TASSC is authorized to take, import and export parts and tissues from marine mammals taken from legally subsistence hunted Steller sea lions and other species. The objectives of this research are to promote Alaska Native participation in Steller sea lion conservation and management; assess the health and condition of Steller sea lions through biological data and tissue collection; educate and inform the public on the traditional and contemporary relationship between the Steller sea lion and Alaska Natives; and work with regulatory agencies toward the common goal of enhancing and protecting healthy Steller sea lion populations.

Issuance of these permits, as required by the ESA, was based on a finding that such permits (1) were applied for in good faith, (2) will not operate to the disadvantage of the endangered species which is the subject of these permits, and (3) are consistent with the purposes and policies set forth in section 2 of the ESA.
